Cities With the Most Women in Construction

Female Construction Employment by Occupation Type Women in the construction industry are most likely to work in office positions Office & Admin. Professional Sales Management & Finance Transportation Construction & Extraction Production Maintenance & Repair 20% 100% 60% 80% Share of construction industry employment Men Women

[Article originally appeared in https://constructioncoverage.com]

By Jonathan Jones

Construction has long been a male-dominated field. According to recently released data from the U.S. Census Bureau, only 11.5% of payroll employees in the construction industry are women. However, a promising shift is underway. In recent years, the Department of Labor's Women in Apprenticeship and Nontraditional Occupations (WANTO) grant program has allocated millions of dollars to bolster women's participation in industries like construction. And with the construction industry facing a massive worker shortage—estimated to exceed half a million workers—recruiting women into construction roles has become not just a priority, but a necessity for sustaining growth and meeting demand.

The share of women in construction has steadily increased over the past several years, marking progress in diversifying the industry. While women remain underrepresented in the workforce, the data reveals a gradual yet consistent upward trend in female employment within the construction sector.

Prior to 2016, women comprised approximately 9% of the construction workforce. This figure held relatively steady for over a decade, fluctuating slightly between 8.9% and 9.5% from 2003 to 2015. However, since 2016, the share

Crackdown on power-guzzling data centers may soon come online in California

[Article originally appeared in https://calmatters.org]

By Khari Johnson, CalMatters

California residents now pay the highest price for electricity in the continental U.S., state analysts reported last month. Costs have been driven in part by levies to prevent and insure against wildfires, but the analysts anticipate a less conspicuous source of pressure on power bills going forward: growing electricity demand from data centers.

Tucked away in nondescript buildings, data centers store and transmit the contents of the internet. At least one is involved every time you watch a TikTok video or shop on Amazon. But in recent years, artificial intelligence, and especially new general purpose systems like ChatGPT, has caused server farms to multiply.

Source: Construction Coverage analysis of U.S. Bureau of Labor Statistics data | Image Credit: Construction Coverage

That means more power plants to build and more transmission lines to run, leaving state regulators increasingly concerned that the general public will be on the hook for Big Tech's electricity binge.

In response, California lawmakers have in recent weeks proposed bills to ensure that electricity customers don't pay for the infrastructure that utility companies build to serve data centers — and to encourage more energy efficiency or use of clean energy on the part of the tech companies, entrepreneurs, and IT departments that utilize the centers.

One measure, from Democratic Assemblymember Rebecca Bauer-Kahan of San Ramon, would require data centers and the developers of large AI models to publicly share how much energy they use. It would also make state energy regulators adopt efficiency standards for data centers.

Another, from Democratic State Sen. Steve Padilla of Chula Vista, would require utility regulators to draw up an electricity rate structure specifically for data centers. A different bill from the senator would give data center operators a tax cut if they create at least 20 jobs and draw 70% of their energy from zero emission sources.

The California legislators join lawmakers from tech hubs across the country in proposing data center power regulations. In Virginia, the busiest place in the world for data center internet traffic, a state legislator earlier this year proposed prohibiting utilities from passing construction and energy infrastructure costs on to customers. Another has reintroduced a bill to require data center projects meet certain energy efficiency standards in order to receive tax credits. Lawmakers in the state are also considering examining whether ratepayers are subsidizing the data center industry.

In Texas, legislators are drafting a bill backed by the nonprofit Environment Texas to tie a sales tax break for data centers to energy efficiency standards.

Elsewhere, the Ohio Public Utilities Commission is considering requiring data centers to pay more of the upfront costs associated with long-term energy contracts. In Oregon, lawmakers are considering a bill that would prevent utility companies from passing costs on to ratepayers and another that would require all data centers to use renewable energy by 2040.

DEI AND WORKFORCE DEVELOPMENT

Rollbacks vs. Reality: 88% Say DEI Efforts Have Tangibly Improved Diversity

Workers insist DEI initiatives have made a lasting impact, with 87% reporting greater inclusivity and diversity in leadership.

[Article originally appeared in www.myperfectresume.com]

In the wake of ongoing rollbacks in corporate DEI programs, a survey from MyPerfectResume®, a leading resource for resume and career advice, has revealed that 88% of U.S. workers think DEI initiatives have improved workplace diversity. The February 2025 Impact of DEI Initiatives survey, with over 1,000 respondents, also found that 87% of employees report that their DEI efforts have positively impacted inclusivity, and 95% say these initiatives have directly improved their personal work experience.

Despite continued debates over the future of workplace diversity programs, these findings make one thing clear—DEI efforts are shaping company culture, increasing representation and addressing challenges underrepresented employees face.

Key Findings:

- 88% of employees say overall company diversity has improved due to DEI initiatives.
- 87% believe DEI efforts have increased diversity in leadership.
- 95% say DEI initiatives have positively impacted their personal work experience.
- 79% have observed positive changes in company culture due to DEI efforts.

 74% feel their DEI programs effectively address challenges for underrepresented employees.

"The data is undeniable—DEI programs are not just a corporate checkbox, they are driving real, measurable change in workplaces," said Jasmine Escalera, career expert at MyPerfectResume. "Employees overwhelmingly recognize the impact of these initiatives, from greater diversity in leadership to improved workplace culture. Yet, despite their success, DEI programs are being unfairly scrutinized—not because they aren't working, but because some leaders are too quick to fold under external pressure."

Targeted Support: DEI's Impact on Work-place Culture

Beyond increasing representation, DEI initiatives are also transforming workplace culture and addressing key challenges:

- 79% of employees say company culture has improved due to DEI efforts.
- 74% believe their company's DEI initiatives effectively address challenges faced by underrepresented groups

Cultural Shifts & Inclusivity: What's Working?

DEI programs are fostering a more inclusive workplace:

- 79% of employees say company culture has become more inclusive.
- 74% feel their employer's DEI initiatives address key barriers for underrepresented groups.

Transparency & Leadership: Employees See DEI Programs Delivering Real Impact

Employees recognize that DEI programs are not just initiatives on paper—they are actively shaping workplace culture in meaningful ways. Companies are measuring progress, keeping employees informed and ensuring DEI remains a priority.

- 89% of companies conduct internal DEI surveys or assessments.
- 76% say leadership communicates about DEI progress.
- 77% say DEI progress reports are shared.

Leadership Accountability: Metrics and Reviews Provide Oversight

Employees recognize that leadership is actively held accountable for DEI efforts through measurable metrics and performance reviews.

 72% say leadership is held accountable through measurable metrics and performance reviews. 23% feel accountability could be improved.

What Companies Have Done to Improve Workplace Inclusivity

Organizations are implementing a variety of strategies to foster inclusivity:

- 47% have support groups for employees with shared identities or experiences.
- 47% provide manager training to foster inclusive teams.
- 45% implement mentorship and career guidance programs.
- 45% focus on diverse hiring efforts.
- 39% offer bias reduction training for employees.
- 37% conduct pay equity reviews to ensure fair compensation across all employees.

"HR teams and DEI professionals have spent years crafting thoughtful, impactful programs that are making a real difference for employees," Escalera added. "The data proves it: DEI efforts are increasing representation, fostering inclusion, and improving company culture. The real challenge isn't the effectiveness of these programs—it's whether leadership has the conviction to stand by them."

BUSINESS TOOLKIT

5 Tips for Reducing Risk in Your Commercial Construction Project

[Article originally appeared in www.constructconnect.com]

By Daniel Behrendt

Whoever came up with the saying "time is money" must have worked in construction. Without proper planning, it's easy to waste both time and cash. The earlier you can spot risks and plan for potential problems, the more likely you are to keep your profits.

Greg Duyka, a senior product training specialist at ConstructConnect, knows a thing or two about this. With 27 years at ConstructConnect and 20 years in estimating and project management, Greg has tackled everything from high-rises to historical restorations. Here are five tips he recommends to reduce your risk, based on his years of real-world experience.

1. Location Matters

Picking the right project location isn't just about the job site—it's about what's surrounding it. Greg advises to be thoughtful about investing in projects that can help support your top and bottom line.

"I once had to manage a job that was a good contract but there was no easy way to get to the site. I ended up having to fly," Duyka says. "Then I had no manpower. When you go far away from

home base you're dealing with inspectors, suppliers, people that don't know you."

When exploring projects in other markets, you also need to consider the qualifications of local crews to help you with that job. "I worked a job where I needed over 4,000 feet of curb and gutter poured," Greg says. "I asked the contractor to meet me on site, and when he got there, he said, 'I can do this, but I don't have the tools'."

Using software like ConstructConnect® Project Intelligence can help you discover construction job leads in the markets where you want to work and connect you with qualified contacts.

2. Know Who You're Working With

Every project has a team, and every team member—whether they're owners, architects, or subcontractors—has a reputation. Do your homework on their business practices.

Greg suggests going to events hosted by trade groups like the Associated General Contractors of America (AGC) and the American Institute of Architects (AIA).

Bid management software tools can also help you better evaluate bids from contractors by

Project: Treasure Island, Stage 2 - SIP & Pump Station Location: San Francisco, CA Owner: Treasure Island Development Group Proposal Publish Date via Building Connected: 03/10/2025 Proposal Due Date: 04/09/2025

A. REQUEST FOR PROPOSAL:

This is not the full RFP. If you are interested in responding and are qualified for the services described below (Section C) please fill out the following Smartsheet at this link https://app.smartsheet.com/b/form/312138f38ae9460d903e8dbc26da6ccc

After receiving the form filled out with Intent to Bid, Bidders will be invited to a BuildingConnected project, where bidders will review all Contract Documents, including instructions on how to bid.

B. PROJECT SUMMARY:

The Stage 2 Site Improvement & Pump Station project is located on the S/E corner of Treasure Island in San Francisco, CA. The project comprises (10) different areas that will be installed in phases from July 2025 through \sim Q3 2028.

The scope of work for the Site Improvement Plans for Stage 2 includes earthwork, dewatering, sheet piling, installation of wet and electrical utilities, site paving, flatwork, landscaping, etc. The Trade Winds Sanitary Pump Station is ~3,000 SF, located along [future] Trade Winds Ave. and will service future buildings on Treasure Island.

C. SCOPES OF WORK FOR THIS REP

WP-01: Utilities & Gas	WP-06: Concrete Flatwork
WP-02: Dry Utilities	WP-07: Landscaping
WP-03: Sheet Piling & Deep Soil Mixing	WP-08: Surveying
WP-04: Dewatering	WP-09: Pump Station
WP-05: Grading & Paving [Inc. Striping and Signage]	

D. SBE GOALS

41% of construction contracts

*SBE's may bid an entire Work Package to Webcor, or a portion of the Work Package to the various subcontractors' bidding the Work Packages. Webcor will require all subcontractors bidding Work Packages to utilize SBE participation if the subcontractor is not an SBE. If you are a qualified SBE interested in bidding a portion of the work, please identify this in the Smartsheet form provided in Section E below.

E. PRE-BID MEETING:

Date: 03/18/2025 - Time: TBD - Location: Zoom (Virtual)

Please RSVP for the pre-bid meeting by filling out the following Smartsheet form: https://app.smartsheet.com/b/form/312138f38ae9460d903e8dbc26da6ccd

F. PREQUALIFICATION

All trade contractors will be required to be prequalified by Webcor Builders in order for your proposal to be accepted and to enter into a contract for the work. If you have been invited to propose on this project and are not currently prequalified by Webcor Builders please visit our website at www.webcor.com/subcontractors

Owner: Los Angeles County Public Works, Project Management Division III Project Name: Naples Island Pump Stations Rehabilitation – Phase II Location: Long Beach, CA Bid Date: March 25, 2025 at 11:00a.m.

Request for Community Business Enterprise (CBE) sub-quotes

Kiewit Infrastructure West Co. (Kiewit) is seeking sub-quotes from qualified Community Business Enterprise (CBE) firms, including Disadvantaged Business Enterprises (DBE), Minority Business Enterprise (MBE), Women Business Enterprises (WBE), Disabled Veteran Business Enterprise (DVBE) firms, LGBTQQ firms; and all other business enterprises to perform as Subcontractors and Material Vendors/Suppliers. CBEs must provide evidence of certification as a Community Business Enterprise by the County of Los Angeles Public Works.

The Naples Island Pump Stations Rehabilitation-Phase II consists of installation of new Southern California Edison electrical services, replacement of main submersible pumps, sump pumps, and discharge pipes and the performance of electrical, mechanical, pump station building improvements and other appurtenant work.

Kiewit is requesting quotes for various areas of work listed in, but not limited to, the scopes of work below:

Abatement, demolition, traffic signs and signals, landscaping, ready mix supply, concrete drilling and saw cutting, metals, stainless steel pipe, plastic fabrication, painting and coating, equipment, sewage and sludge pump, mobile crane, bolts and gaskets, hangers and support, valves and electrical work.

Firms interested in providing a sub-quote for this project must contact Kiewit and responding firms will be issued an "Invitation to Bid" through Kiewit's electronic use of BuildingConnected system (at no cost to bidder) with project information and bid instructions. Plans and specifications are also available for review at Kiewit's office.

Responsive bidders must possess a valid California Contractor's license (as appropriate) and provide acceptable insurance Responsible subcontractors and material contractors will be required to provide bonding for 100% of their contract value. Kiewit will reimburse bond premiums. Kiewit is union contractor signatory to collective bargaining agreements with the carpenters, laborers, cement masons, ironworkers, operating engineers and teamsters. Kiewit will consider quotes from all bidders who demonstrate an ability to foster and maintain labor harmony on the Project.

Kiewit intends to conduct itself in good faith with all CBEs regarding participation on this project. For further information regarding this project, licensing, insurance, bonding, related assistance with equipment, supplies, and materials, or the project schedule, please contact our Lead Estimator.

SFTC intends to conduct itself in good faith with DBE firms regarding participation on this project. More info about this project is available at www.sftcjv.com. San Fernando Transit Constructors is an EEO/AA/Vet/Disability Employer.

MARCH 06, 2025 - MARCH 12, 2025 SMALL BUSINESS EXCHANGE 7

AWARDS AND RECOGNITIONS

Granite's Award-Winning BNSF Needles Third Main Track Project

[Article originally appeared in www.graniteconstruction.com l

We are proud to announce the successful completion and recognition of the BNSF Needles Third Main Track Project On February 7th this project received a 2025 Constructors Award from the Associated General Contractors of California (AGC of California) in the Heavy Civil (\$25 million to \$50 million) category, recognizing excellence in construction. This is the most recent in a long line of awards for the project, which in 2024 was honored with the California Transportation Foundation's "Goods Movement Project of the Year," the American Council of Engineering Companies' "Engineering Excellence Awards: National Recognition Award," the American Council of Engineering Companies of California's "Engineering Excellence Awards: Honor Award," and was a finalist for the American Society of Civil Engineers, San Bernardino-Riverside Branch "Project of the Year Award."

The scope for this project included construction of a 29-mile third rail line that ran parallel to an existing track in the challenging desert environment of Needles, California. Extensive excavation was performed, including moving 340,000 cubic yards of dirt and 30,000 cubic yards of solid granite rock, and placing 97,000 cubic yards of sub ballast. Additionally, the team extended 48 culverts, drove 651 steel piles, and built 50 new bridges and crash protection walls under Interstate 40. Working in a sensitive environmental area, Granite implemented

The team pictured left to right; Bill Moore, Granite Vice President of Regional Operations; Jeff PyeattCook, Granite Project Manager; Evan Garber, Granite Project Manager; Muin Mustafa, Granite Project Executive; Joe Richardson, Granite Chief Estimator, Jason Sanchez, BNSF Railway Manager

a robust Environmental Compliance Plan to mitigate impacts, particularly to protect sensitive species like the Desert Tortoise.

Originally planned as a bid-build, the project shifted to a Construction Manager/General Contractor (CM/GC) approach, allowing for enhanced collaboration among BNSF, Granite, and other stakeholders. This shift enabled early constructability reviews and risk assessments, leading to cost savings and scheduling efficien-

cies. Strategic planning and environmental considerations improved site access and staging, facilitating project logistics without ecological

"It was an honor to build this project with such a great team, and winning this award is a testament to Granite's legacy of being America's Infrastructure Company," said Granite Project Manager, Evan Garber. "Partnering with BNSF on this project that enhanced rail efficiency on the Southern Transcontinental Railroad was a huge success that took collaborative efforts by all parties involved."

Managing train operations along the Southern Transcon, the busiest BNSF corridor, required precise coordination to avoid service disruptions. Despite challenges such as the remote location and adverse weather conditions, the project maintained an impressive safety record with more than 82,000 man-hours worked with zero OSHA recordables. Early material procurement and innovative solutions, including drilling a new well for construction water contributed to the project finishing on time and under budget.

Granite is proud of our team's hard work and dedication to delivering this award-winning project. This achievement underscores our commitment to excellence and our role as a leader in the construction industry.

√idya Murugan Senior Risk Manage

PROGRAM

Risk and uncertainty are a constant in every project, yet many fail because they are not prepared to manage it effectively. Whether it's due to overly optimistic assumptions, insufficient planning, or unforeseen challenges, unmanaged risks can disrupt schedules, inflate budgets, and jeopardize project objectives.

Budgets, and peopardize project objectives. Risk management is the foundation of successful project delivery. This webinar will provide a straightforward introduction to the straightforward introduction to the sease in management easy to called ctand steps. From identifying and assessing risks to developing strategies for mitigation and response, this session will demystify the concepts and show how risk management can be applied to real-world scenarios.

Crackdown on power-guzzling data centers may soon come online in California

Continued from page 1

Taken together, the state-level regulations could, if approved, have a global impact. Most data centers in the world are in the U.S., with the greatest number of those in California, Texas, and Virginia. The laws would also represent something of a legislative vibe shift: More than half of U.S. states court data centers — and the revenue they bring — by offering them tax breaks.

As data centers spread, so do costs

Though coming to the fore now, data center power demands have been a concern for years. The U.S. Department of Energy launched an initiative in 2008 to help get the issue under control. But the spread of general purpose artificial intelligence made by companies like Google and OpenAI, whose development relies on powerhungry graphical processors, is making the problem worse. The data centers that trained a recent version of the AI model behind ChatGPT use as much electricity as 30 Walmart stores, researchers recently told the Wall Street Journal.

A Chinese company, DeepSeek, offered some hope for efficiency in recent weeks when its app reached #1 on Apple and Google stores. The chat tool is powered by an AI model developed with a fraction of the resources required by major American models, its creators claim. U.S. companies are also under pressure from tech researchers pushing them to abandon their quest for AI to accomplish virtually any task and instead make models for specific tasks. Doing so would greatly reduce energy and water demands.

But, so far, data center expansion shows no signs of slowing in California, said Sylvie Ashford, an energy and policy analyst at The Utility Reform Network. Ashford said the need to run transmission lines to data centers could hike prices for California ratepayers, one in five of whom are already behind on paying their electricity bill.

"Regulators need to shield residential and small business customers from shouldering the brunt of these new data center costs," Ashford said. "California needs to be proactive and develop equitable solutions for cost recovery and electric rate design, so that data centers are paying their fair share for system improvements."

In the southeastern United States, "ratepayers are subsidizing the cost of electrical infrastruc-

Electrician Oscar Rivas works on a new generator system on the third floor of One Wilshire, a high-rise office building that has been almost entirely converted into a server farm or data center in downtown Los Angeles on Sept. 10, 2024. Photo by Genaro Molina, Los Angeles Times via Getty Images

ture being built to serve data centers," including gas power plants and pipelines, according to a report published last month by the Institute for Energy Economics and Financial Analysis. Data centers are referred to as a root cause for a rise in energy costs this year in the mid-Atlantic region of the U.S., according to energy industry analysts who spoke with the Washington Post.

The California lawmakers trying to regulate data centers were unable to point to a particular example of when utilities pass data center costs on to consumers. But Padilla said that similar data center regulations are under consideration in multiple states because "People realize the very real ratcheting up of costs and what that does to people's ability to thrive and live and invest. We should be very clear eyed about what are the impacts and how do we get ahead of that."

Bauer-Kahan said her measure aims to address problems that could surface in the future.

"If you put these huge data centers on the grid, soak up some of that energy, and the demand continues to rise, we need to make sure those

costs are not being borne by the ratepayers in order to enrich these private companies," she said.

There is evidence, albeit inconclusive, that California data centers could already be fueling higher costs and plans to incur them.

Recent presentations to investors by Pacific Gas & Electric and Southern California Edison detail an influx of large projects and costly infrastructure investments. Pacific Gas & Electric received dozens of data center proposals last year, according to the Los Angeles Times.

Last month the municipal utility company in Santa Clara announced a 5% increase in rates for all customers due to "critical infrastructure projects." Santa Clara is the busiest city in California for data center activity, with more than 50 server farms gobbling up 60% of energy from the utility. The increase was for projects that benefit everyone, an executive with the utility, Manueal Pineda of Silicon Valley Power, told CalMatters.

Just as increased traffic on roads leads to congestion and delays, the addition of large data center

loads to the power grid can, in theory, drive up overall electricity demand and exacerbate transmission congestion, said UC Riverside professor Shaolei Ren, who studies the environmental impact of data centers. But he said the connection between data centers and higher utility rates for residential customers isn't always straightforward. While utility rates have risen steadily, these increases are the result of a complex mix of factors including inflation.

"That said, precautionary legislation and regulations are still valuable," Ren added. "These can help protect residential customers from potential rate spikes as more data centers come online, ensuring that households aren't suddenly burdened by sharp increases in electricity costs."

How data centers impact the environment, health, and housing

Costs to electricity ratepayers are just one potential consequence from high energy consumption by data centers.

By 2030, data centers could contribute to 1,300 premature deaths in California, carry \$20 billion in health care costs, and rival greenhouse gas emissions of every car in California as a cause of health costs, according to an evaluation published last month by the California Institute of Technology and UC Riverside researchers including Ren.

A Lawrence Berkeley National Laboratory report compiled for the Department of Energy estimates that data center energy use has tripled over the past decade and is projected to double or triple by 2028. A Morgan Stanley report released last fall found that within five years, the global data center industry could produce 40% of annual U.S. emissions.

Analysis of power company activity in the United States shows the rapid growth of data centers is getting in the way of initiatives to reduce greenhouse gas emissions, according to a forthcoming report from the Center for Biological Diversity, a nonprofit conservation group that filed the lawsuit to block the construction of a data center in California in December 2024.

5 Tips for Reducing Risk in Your Commercial Construction Project

Continued from page 2

evaluating the contractors themselves, based on their safety, performance, and financial records.

3. Get Smart About Materials

One of the quickest ways to go over budget is by choosing the wrong materials or using them incorrectly. In an industry where only 31% of construction projects finish within budget, it's important to keep a close eye on areas where costs can get out of control.

Greg shares some examples to show why doing research is key:

"I was part of a big job that needed these 30-foot-wide rolling doors that had to come a long way by train, from Canada. Then, they needed a special heavy-duty crane just to unload them and a half acre of space to store them."

Another time, he managed a historical renovation needing custom woodwork, "It was originally done

in the 1800s. There aren't many people alive who know how to do it anymore! There were guys in England who could do it, so we had to arrange to have them come over and get it done."

Lesson learned? Plan ahead for special tools, equipment, or skills and budget accordingly by getting as much information about a project as you can before you send the bid.

4. Be Realistic About Deadlines

Finishing a project on time is another way to stay within budget, but it can be tough if a developer has unrealistic expectations. Sometimes, developers may want to rush a job, but it's important to be honest about whether it can be done on time.

"I once had an owner ask me to do a 200-room hotel, which is an eight or nine-month job, in six months," he says. "They're paying interest on that loan, so they're always going to try and bring things in quicker."

Duyka says there are some warning signs that your project may have inherent risk. For example, owners sometimes include a bonus/penalty clause in their contracts: "An owner may try to take money out of your fee if you don't meet the deadline, or the reverse, they'll give you a little extra if you finish ahead of time.""

It's best to get a clear view of all the plan documents for a project ahead of time. Using digital takeoff software helps ensure your measurements and counts are correct before creating an estimate. It will also help you have more confidence about delivering to agreed-upon deadlines.

5. Be Careful with Bonding

Strong bonding is vital for growth in commercial construction, but it's important to manage it carefully.

"First of all, building up strong bonding capacity takes a while. When an agency agrees to bond you, it's like a job interview. Then, you build up your capacity over time," Greg says.

He also warns that a company can reach its bonding limit too quickly if they're not careful "I've seen companies reach the limits of their bonding capacity and miss out on being able to bid on the easy in and out projects."

Strategy is key—balance long-term growth with immediate opportunities.

Final Thoughts

Greg's tips can help contractors avoid problems and make better decisions on their projects. Using leading tools like ConstructConnect's project data and takeoff and estimating software can save you time, improve the accuracy of your bids, and be better prepared when you get ready to work on your chosen commercial construction projects.

MARCH 06, 2025 - MARCH 12, 2025 SMALL BUSINESS EXCHANGE 9

Cities With the Most Women in Construction

Continued from page 1

of female employees in construction has climbed nearly every year, reaching 11.1% in 2022 and continuing to rise to 11.5% by 2023. This growth reflects both industry efforts to address workforce shortages and initiatives aimed at increasing diversity, such as targeted training programs and grants.

Nationwide, over 1.3 million women are employed in the construction sector, compared to more than 10 million men. This gender disparity is evident not only in overall employment numbers but also in the types of roles occupied by men and women. Women are far more likely to work in office and administrative positions, while men dominate field-based roles.

According to the Bureau of Labor Statistics, women make up nearly 80% of the construction industry's office and administrative roles. They also are more highly concentrated in professional, sales, and management roles compared to other occupations in the sector. However, female representation is significantly lower in roles traditionally associated with fieldwork. Only 4.5% of transportation positions and 4.1% of construction and extraction roles are filled by women. Representation is even lower in maintenance and repair jobs, as well as production roles, where women account for just 2.0% and 3.5% of workers, respectively.

A major benefit for women in the construction industry is that they tend to command higher wages than female workers in other fields. The median annual wage for full-time female construction industry workers is \$54,044, exceeding the median of \$52,458 for women across all industries. This wage advantage highlights the potential of construction as a lucrative career path for women.

Interestingly, the opposite is true for men in construction, who typically earn less than their counterparts in other sectors. Male workers in the construction industry have a median annual wage of \$56,805, compared to \$64,705 for male workers across all industries.

Another noteworthy aspect of wages in construction is the narrower gender pay gap. While the national gender pay gap across all industries sits at approximately 18.9%, the gap in construction is significantly smaller at just 4.9%.

While the construction industry remains maledominated nationally, the underrepresentation of women in construction is less pronounced in certain parts of the country. This variation highlights regional differences in workforce dynamics, compensation levels, and diversity efforts within the industry.

Alaska and Hawaii lead the nation in female construction employment, with women making up 13.8% and 13.4% of the industry's workforce, respectively. These states likely benefit from the relatively high wages offered in the construction sector, which can be an attractive factor for women entering the field. States in the Pacific Northwest, such as Washington (12.7%) and Oregon (12.5%), and parts of the South Atlantic, including Florida (13.3%) and Maryland (12.4%), also report female representation above the national average of 11.5%.

PUBLIC LEGAL NOTICE ADVERTISEMENTS

OAKLAND UNIFIED SCHOOL DISTRICT DEPARTMENT OF FACILITIES PLANNING AND MANAGEMENT

NOTICE TO BIDDERS DOCUMENT 00 11 11

Notice is hereby given that the Oakland Unified School District (hereinafter referred to as "Owner") will receive sealed bids prior to the date and time stated for the bid opening for the award of a contract to construct the ("Contract"), **Project No. 25003**

Jefferson Child Development Center Roofing, Asphalt, & Playground Improvements 1975 40th Avenue, Oakland, CA 94601

as per the Contract Documents, including the drawings and specifications, which may be obtained from the Printing Facility listed below.

Project consists of:

Remove single-ply roofing on the overhang and install 2-ply torch-down. Add drains with crickets for proper slope. Replace cap with full cap. Repair, repaint, and replace all dry rot.

Provide warranty for Contractor and Material. Asphalt Replacement: Remove and replace asphalt with 3" HMA, ensuring proper slope to drains. Repair and replace drains as needed. Install header boards where needed. Stripe playground per site-coordinated plan. Provide warranty for Contractor and Material. Playground Improvements: Remove and replace play matting. Replace grass patch with new grass. Ensure all work meets with OUSD standars.

Engineer's Estimate: \$350,000.00

Project Manager is Marcus Board, who can be reached at: marcus.board@ousd.org or 510-277-6719

The Owner reserves the right to add or deduct any of the additive or deductive items after the lowest responsible and responsive bidder is determined. The lowest bid shall be determined on the amount of the base bid.

This Contract is not subject to prequalification pursuant to Public Contract Code section 20111.6. Prospective bidders must currently be on the District's Certified Contractor's List.

This Contract is not subject to the District's Project Labor Agreement. The full version of OUSD's latest Project Labor Agreement can be found by going to the OUSD home page: https://www.ousd.org/facilitiesplanning-management-department/opportunities

Contract Documents will be available for review on or after <u>February 26, 2025</u>, at **East Bay Blue Print, located at 1745 14th Avenue, Oakland, CA 94606**. All requests should be addressed Attention: Sandy Petty. Plans can be ordered by:

Ph: 510-261-2990 Fax: 510-261-6077

 $Email:\ ebbp@eastbayblueprint.com,$

Attn: Sandy. Online using the Plan Command System at www.eastbayblueprint.com or plans can be delivered to a place of business, at requester's own expense. Payment for plan sets must be made with East Bay Blue Print and are NON-REFUNDABLE

In addition, Contract Documents are available for bidders' review at the following builders' exchanges:

Builder's Exchange of Alameda County McGraw Hill Construction Data San Francisco Builder's Exchange Reed Construction Market Data Contra Costa Builder's Exchange Marin Builder's Exchange

Public works projects shall be subject to compliance monitoring and enforcement by the Department of Industrial Relations. For all projects over Twenty-Five Thousand Dollars (\$25,000), a contractor or subcontractor shall not be qualified to submit a bid or to be listed in a bid proposal subject to the requirements of Public Contract Code section 4104 unless currently registered and qualified under Labor Code section 1725.5 to perform public work as defined by Division 2, Part 7, Chapter 1 (§§1720 et seq.) of the Labor Code. For all projects over Twenty-Five Thousand Dollars

(\$25,000), a contractor or subcontractor shall not be qualified to enter into, or engage in the performance of, any contract of public work (as defined by Division 2, Part 7, Chapter 1 (§§1720 et seq.) of the Labor Code) unless currently registered and qualified under Labor Code section 1725.5 to perform public work and proof of registration is provided.

The Contract Time shall be sixty (60) calendar days, and liquidated damages for delay shall accrue.

Bids must be sealed and filed at

Front Desk Facilities Planning & Management, 955 High Street, Oakland, CA 94601

on March 18, 2025, before 2:00 p.m. on the clock designated by the Owner or its representative as the bid clock at or after which time the bids will be opened and publicly read aloud. No bid will be accepted by the Owner after this time. Facsimile (FAX) copies of the bid will not be accepted. Any bid that is submitted after this time shall be nonresponsive and returned to the bidder. Any claim by a bidder of error in its bid must be made in compliance with section 5100 et seq. of the Public Contract Code.

Mandatory pre-bid **site visit** will be held on <u>March 6</u>, <u>2025 at 10:00 a.m.</u>, at Front entrance of the Jefferson CDC Site. Bidders not attending the **site visit** will be disqualified.

Bids must be accompanied by a bidder's bond, cashier's check, or certified check for at least ten percent (10%) of the amount of the base bid and made payable to the Owner, as detailed in the Contract Documents.

Owner, or its designee, has determined that certain materials, services, products or things designated by specific brand or trade name shall not be subject to Public Contract Code section 3400(a) in order that a field test or experiment may be made to determine the product's suitability for future use; in order to match other materials, services, products or things in use on a particular Owner public improvement either completed or in the course of completion; in order to obtain a necessary item that is only available from one source; and in order to respond to an emergency declared by Owner.

Pursuant to the Contract Documents, the successful bidder will be required to furnish a Payment (Labor and Material) Bond in the amount of one hundred percent (100%) of the Contract Sum, and a Faithful Performance Bond in the amount of one hundred percent (100%) of the Contract Sum.

The successful bidder will be allowed to substitute securities or establish an escrow in lieu of retainage, pursuant to Public Contract Code Section 22300, and as described in the Agreement Between Owner and Contractor and General Conditions.

The Owner will not consider or accept any bids from contractors who are not licensed to do business in the State of California, in accordance with the California Public Contract Code, providing for the licensing of contractors. In accordance with Section 3300 of said Code, the bidder shall have an Class A General Engineering Contractor and/or B- General Building Contractor's license at the time of award and shall maintain that license in good standing through Completion of the Contract and all applicable warranty periods. For all projects over Twenty-Five Thousand Dollars (\$25,000), the bidder shall state the public works contractor registration number on the Designation of Subcontractors form for each subcontractor performing more than one-half of one percent (0.5%) of the bidder's total bid.

The Director of Industrial Relations of the State of California, in the manner provided by law, has ascertained the general prevailing rate of per diem wages and rate for legal holidays and overtime work. The Contractor must pay for any labor therein described or classified in an amount not less than the rates specified. Copies of the required rates are on file at the Owner's business office and are available on request.

Kaiser Child Development Center Boiler Replacement 25 S. Hill Ct., Oakland, CA 94618

as per the Contract Documents, including the drawings and specifications, which may be obtained from the Printing Facility listed below.

Project consists of:

Boiler Replacement: Remove and properly dispose of the existing boilers. Supply and install two (2) Raypak High Delta 1 million BTU boilers. Reconnect new boilers to the existing system, ensuring full functionality. Additional Boiler & Pump Replacement: Remove and replace one (1) 80,000 BTU boiler. Remove and replace the related pump with a new, compatible unit. Air Compressor Replacement: Remove and dispose of the existing 30-gallon air compressor. Supply and install a new 30-gallon air compressor, preferably Raypak.

Control System Integration: Reconnect all newly installed boilers to the existing Honeywell EMS controller. Identify and disconnect all unnecessary or redundant control components.

Abatement and Site Preparation: Conduct necessary abatement procedures in compliance with applicable regulations. Ensure the worksite is properly prepared for new equipment installation.

Ensure all work meets building and plumbing codes and complies with OUSD standards.

Hazmat report included C-22 license required.

Engineer's Estimate: \$350,000.00

Builder's Exchange of Alameda County McGraw Hill Construction Data San Francisco Builder's Exchange Reed Construction Market Data Contra Costa Builder's Exchange Marin Builder's Exchange

Public works projects shall be subject to compliance monitoring and enforcement by the Department of Industrial Relations. For all projects over Twenty-Five Thousand Dollars (\$25,000), a contractor or subcontractor shall not be qualified to submit a bid or to be listed in a bid proposal subject to the requirements of Public Contract Code section 4104 unless currently

registered and qualified under Labor Code section 1725.5 to perform public work as defined by Division 2, Part 7, Chapter 1 (§§1720 et seq.) of the Labor Code. For all projects over Twenty-Five Thousand Dollars (\$25,000), a contractor or subcontractor shall not be qualified to enter into, or engage in the performance of, any contract of public work (as defined by Division 2, Part 7, Chapter 1 (§§1720 et seq.) of the Labor Code) unless currently registered and qualified under Labor Code section 1725.5 to perform public work and proof of registration is provided.

The Contract Time shall be sixty (60) calendar days, and liquidated damages for delay shall accrue.

Bids must be sealed and filed at

Front Desk Facilities Planning & Management, 955 High Street, Oakland, CA 94601

on March 18, 2025, before 2:15 p.m. on the clock designated by the Owner or its representative as the bid clock at or after which time the bids will be opened and publicly read aloud. No bid will be accepted by the Owner after this time. Facsimile (FAX) copies of the bid will not be accepted. Any bid that is submitted after this time shall be nonresponsive and returned to the bidder. Any claim by a bidder of error in its bid must be made in compliance with section 5100 et seq. of the Public Contract Code.

Mandatory pre-bid **site visit** will be held on <u>March</u> **6, 2025 at 2:00 p.m.,** at Front entrance of the Kaiser CDC Site. Bidders not attending the **site visit** will be disqualified.

Bids must be accompanied by a bidder's bond, cashier's check, or certified check for at least ten percent (10%) of the amount of the base bid and made payable to the Owner, as detailed in the Contract Documents.

Owner, or its designee, has determined that certain materials, services, products or things designated by specific brand or trade name shall not be subject to Public Contract Code section 3400(a) in order that a field test or experiment may be made to determine the product's suitability for future use; in order to match other materials, services, products or things in use on a particular Owner public improvement either completed or in the course of completion; in order to obtain a necessary item that is only available from one source; and in order to respond to an emergency declared by Owner.

Pursuant to the Contract Documents, the successful bidder will be required to furnish a Payment (Labor and Material) Bond in the amount of one hundred percent (100%) of the Contract Sum, and a Faithful Performance Bond in the amount of one hundred percent (100%) of the Contract Sum

The successful bidder will be allowed to substitute securities or establish an escrow in lieu of retainage, pursuant to Public Contract Code Section 22300, and as described in the Agreement Between Owner and Contractor and General Conditions.

The Owner will not consider or accept any bids from contractors who are not licensed to do business in the State of California, in accordance with the California Public Contract Code, providing for the licensing of contractors. In accordance with Section 3300 of said Code, the bidder shall have an Class C-4 Boiler, Hot Water Heating and Steam Fitting and C-22-Hazmat Contractor's license at the time of award and shall maintain that license in good standing through Completion of the Contract and all applicable warranty periods. For all projects over Twenty-Five Thousand Dollars (\$25,000), the bidder shall state the public works contractor registration number on the Designation of Subcontractors form for each subcontractor performing more than one-half of one percent (0.5%) of the bidder's total bid.

The Director of Industrial Relations of the State of California, in the manner provided by law, has ascertained the general prevailing rate of per diem wages and rate for legal holidays and overtime work. The Contractor must pay for any labor therein described or classified in an amount not less than the rates specified. Copies of the required rates are on file at the Owner's business office and are available on request.

OAKLAND UNIFIED SCHOOL DISTRICT DEPARTMENT OF FACILITIES PLANNING AND MANAGEMENT

REQUEST FOR QUALIFICATIONS AND PROPOSALS (RFQ/P)

Environmental Site Assessment
Consulting Services
Interim Housing and Modernization Project for
Garfield Elementary School
1640 22nd Avenue, Oakland, CA 94606
Project No. 22102
February 21, 2025 (Issued)
Responses must be received
March 12, 2025, no later than 2:00 p.m.

The Oakland Unified School District ("District") is requesting proposals from experienced firms, partnerships, corporations, associations, persons or professional organizations ("Consultants") to provide environmental site assessment ("ESA") consulting services associated with the Interim Housing and Modernization Project for Garfield Elementary School ("Project").

Interested firms are invited to submit a complete Statement of Qualifications ("SOQ") and a detailed Fee Proposal (collectively "RFQ/P Packet") as described below of the requested materials with a cover letter addressed to:

Oakland Unified School District Kenya Chatman, Executive Facilities Director Department of Facilities Planning and Management 955 High Street, Oakland, CA 94601

Oral, telegraphic, facsimile, or telephone RFQ/P Packets will not be accepted. RFQ/P Packets received after this date and time will not be accepted. The District reserves the right to waive any informalities or irregularities in the RFQ/P Packets. The District also reserves the right to reject any and all RFQ/P Packets and to negotiate contract terms with one or more Respondents.

The District will only accept a hard copy proposal along with a PDF version on a flash drive. Proposals received by the District no later than 2:00 PM (Pacific Time) on March 12, 2025 will be submitted (attention to Juanita Hunter)

If you have any questions regarding this RFQ/P and/or submitting proposal electronically, please email Kenya Chatman at kenya.chatman@ousd.org and cc: to Colland Jang at colland.jang@ousd.org

LOCAL, SMALL LOCAL AND SMALL LOCAL RESIDENT BUSINESS ENTERPRISE PROGRAM

District Modification: The District is modifying the LBU requirement for environmental site assessment services based on the availability analysis performed by the District's local business utilization consultant. The 25% SLBE portion of the District's 50% local business utilization requirement (referenced below) is waived. The minimum local business utilization requirement of 50% remains applicable.

For reference, the Local Business Utilization Policy 7115 requires that there is a mandatory fifty percent (50%) LBU participation with a 25% or less Local Business (LBE) participation and a 25% or more Small Local or Small Local Resident Business (SLBE/SLRBE) participation for all capital program/construction-related contracts and professional services agreements.

On April 28, 2021, the Board of Education amended the Local Business Policy which had named the City of Oakland as the singular agency to certify local businesses to include five additional local business certifications. For businesses located in Oakland, Local Business and Small Local Business certifications may also be accepted from the Port of Oakland, Alameda County Transportation Commission, Alameda County Department of General Services, US Department of Transportation California Public Utilities Commission. The District will follow the City of Oakland Small Business size standards in recognizing Small Local and Small Local Resident Businesses.

The full version of OUSD's latest Local, Small Local and Small Local Resident Business Enterprise Program can be found by going to the following link:

https://www.ousd.org/facilities-planning-management/opportunities/lbu-policy

FULL OPPORTUNITY

The District hereby affirmatively ensures that Disadvantaged Business Enterprises ("DBE"), Small Local Business Enterprise ("SLBE"), Small Emerging Local Business Enterprise ("SELBE") and Disabled Veterans Business Enterprise ("DVBE") firms shall be afforded full opportunity to submit qualifications in response to this notice and will not be discriminated against on the basis of race, color, national origin, ancestry, disability, gender, transgender status, political affiliation, or religion in any consideration leading to the award of contract. No qualified disabled person shall, on the basis of disability, be excluded from participating in, be denied the benefits of, or otherwise by subjected to discrimination in any consideration leading to the award.

OAKLAND UNIFIED SCHOOL DISTRICT DEPARTMENT OF FACILITIES PLANNING AND MANAGEMENT

REQUEST FOR QUALIFICATIONS AND PROPOSALS (RFO/P) CEQA Consulting Services

Interim Housing and Modernization Project for Garfield Elementary School 1640 22nd Avenue, Oakland, CA 94606 Project No. 22102 February 21, 2025 (Issued) Responses must be received March 12, 2025, no later than 2:00 p.m.

The Oakland Unified School District ("District") is requesting proposals from experienced firms, partnerships, corporations, associations, persons or professional organizations ("Consultants") to provide services in accordance with the provisions of the California Environmental Quality Act ("CEQA") associated with the Interim Housing and Modernization Project for Garfield Elementary School.

Interested firms are invited to submit a complete Statement of Qualifications ("SOQ") and a detailed Fee Proposal (collectively "RFQ/P Packet") as described below of the requested materials with a cover letter addressed to:

Oakland Unified School District Kenya Chatman, Executive Facilities Director Department of Facilities Planning and Management 955 High Street, Oakland, CA 94601

Oral, telegraphic, facsimile, or telephone RFQ/P Packets will not be accepted. RFQ/P Packets received after this date and time will not be accepted. The District reserves the right to waive any informalities or irregularities in the

RFQ/P Packets. The District also reserves the right to reject any and all RFQ/P Packets and to negotiate contract terms with one or more Respondents.

The District will only accept a hard copy proposal along with a PDF version on a flash drive. Proposals received by the District no later than 2:00 PM (Pacific Time) on March 12, 2025 will be submitted (attention to Juanita Hunter)

If you have any questions regarding this RFQ/P and/or submitting proposal electronically, please email Kenya Chatman at kenya.chatman@ousd.org and cc: to Colland Jang at colland.jang@ousd.org

LOCAL, SMALL LOCAL AND SMALL LOCAL RESIDENT BUSINESS ENTERPRISE PROGRAM

District Modification: Based on the availability analysis conducted for CEQA Consulting Services, the District has waived its mandatory Local Business Utilization Policy requirement for LBE/SLBE/SLRBE certifications for this RFQ/P.

FULL OPPORTUNITY

The District hereby affirmatively ensures that Disadvantaged Business Enterprises ("DBE"), Small Local Business Enterprise ("SLBE"), Small Emerging Local Business Enterprise ("SLBE") and Disabled Veterans Business Enterprise ("SELBE") and Disabled Veterans Business Enterprise ("DVBE") firms shall be afforded full opportunity to submit qualifications in response to this notice and will not be discriminated against on the basis of race, color, national origin, ancestry, disability, gender, transgender status, political affiliation, or religion in any consideration leading to the award of contract. No qualified disabled person shall, on the basis of disability be excluded from participating in, be denied the benefits of, or otherwise by subjected to discrimination in any consideration leading to the award.

PUBLIC LEGAL NOTICE ADVERTISEMENTS

UNIVERSITY OF CALIFORNIA, IRVINE

REQUEST FOR QUALIFICATIONS FOR EXECUTIVE ARCHITECT ARCHITECTURAL & ENGINEERING (A&E) SERVICES

FOR THE: B28, Coffee Kiosk Building Remodel

Under the guidelines of CA Public Contract Code 10510.4 - 10510.9, the University is seeking the best qualified firm with experience in design of restaurants or food service areas in healthcare facilities to provide <u>A&E Services</u> in support of the remodel of Building 28, Coffee Kiosk at UCI Health, Orange, CA.

The selected consultant will program and design a refresh of an existing coffee kiosk building. Scope of work includes programming, schedule and budget assessment, full design/construction documents and construction administration services - to provide a new exterior and interior to an existing building, updating the aesthetic and incorporating the new specified kitchen equipment and IT infrastructure, for a total project cost not-to-exceed \$1.35 million.

Design services will be authorized on an "as-needed" basis and are contingent upon project approvals, funding and the quality of services delivered by the design professional.

Est. Contract Value: \$100,000 or greater

RFQ DOCUMENTS AVAILABLE Wednesday, 03/05/25. TO OBTAIN RFQ PACKET (REQUIRED FORMS) email Kim Kerwin at khau@hs.uci.edu or Maryann Gonzales @ maryacg1@hs.uci.ed.

Address (1) original, (2) hard copies and an electronic copy in USB of the qualification submittal to Kim Kerwin, UCIMC Planning, Design & Construction, 101 The City Drive South, Bldg. 27, Rte. 131; Orange, CA 92868. Deadline for RFQ submittal is 3/26/25 @ 2:00 PM.

Every effort will be made to ensure that all persons shall have equal access to contracts and other business opportunities with the University, regardless of: race; color; religion; sex; age; ancestry; national origin; sexual orientation; physical or mental disability; veteran's status; medical condition; genetic information; marital status; gender identity; pregnancy; service in the uniformed services; or citizenship within the limits imposed by law or University's policy. The selected consulting firm will be required to show evidence of their Equal Employment Opportunity policy.

For other opportunities, http://www.healthaffairs.uci.edu/planning-administration/

Housing Authority: The Housing Authority of the City and County of San Francisco (Authority) is actively seeking new property owners to participate in the Section 8 Housing Choice Voucher (HCV) program. The program provides housing assistance to eligible individuals and families by paying a portion of their rent to private property owners. **Key benefits**: 1. Guaranteed Monthly Rent: Property owners can rely on timely direct deposit rental payments from the Authority. 2. Expanded Tenant Pool: Property owners gain access to a broader pool of prospective tenants. 3. Community Impact: Partnering with the Authority supports affordable housing and the community. We are interested in expanding housing opportunities in San Francisco zip codes 94129, 94123, 94105, 94127, 94114, 94131, 94116, 94118, 94158, 94122, 94107, 94117, 94112, 94121, 94110 and immediate suburban areas. For more information, please contact us at customercare@efha.org or learn more at www.sfha.org.

The City and County of San Francisco encourages public outreach. Articles are translated into several languages to provide better public access. The newspaper makes every effort to translate the articles of general interest correctly. No liability is assumed by the City and County of San Francisco or the newspapers for errors and omissions.

SANTA VALLEY WATER DISTRICT (VALLEY WATER)

NOTICE TO PROSPECTIVE PROPOSERS REQUEST FOR PROPOSALS (RFP)

PB FILE NO. VW0542
DESIGN SERVICES FOR
DEMONSTRATION GARDEN

Santa Valley Water District (Valley Water) is seeking proposals from qualified landscape architect firms to provide landscape architect design services for the Design Services for Demonstration Garden Project. Parties interested in obtaining a copy of this RFP may do so by accessing the Valley Water's web portal at https://vendors.planetbids.com/portal/48397/portal-home. All parties are asked to register on the Santa Clara Valley Water District Procurement Portal, PlanetBids, to be automatically notified of any changes to the RFP document. Proposals are due by 2:00 p.m. on March 20, 2025 as specified in the RFP Schedule.

All questions regarding this solicitation must be submitted directly in Valley Water's web portal at the link listed above no later than the date specified in the RFP Schedule.

SUCCESS STORIES

Bailey's Premier Services, LLC

Tamiko Bailey

[Article originally appeared in www.sba.gov]

While serving in the United States Air Force, Tamiko Bailey had a life-changing experience. After an incentive flight in an F-15 fighter jet, she knew she wanted to make a career of working in the aviation industry. In 2010, Bailey, a service-disabled veteran, founded Bailey's Premier Services as a small startup company from her garage. The company has grown tremendously since and is now a multi-state defense contractor that provides aircraft maintenance and other support services to the US government and state/local agencies.

As she built her business, Bailey utilized several SBA resources to help the business grow. She received entrepreneurial development services through the SBA Veterans Business Outreach Center (VBOC) and was also nominated by the VBOC to enroll in VIP VetBiz and Dartmouth's Tuck School of Business.

Like many business owners, Bailey accumulated some debt during her small business journey. She knocked on doors where opportunities were available and took on multiple offers from lenders, which came with very high interest rates up to 25% in some cases. Bailey took the loans that were available to her so that she could operate her business, but the high interest rates took a toll on the company.

Eventually, a Small Business Development Center (SBDC) coordinator provided information about applying for an SBA 7(a) loan. Bailey secured an SBA 7(a) loan in 2018 and the financing helped her pay off the remaining debt and helped her focus on the growth of her company. Bailey was able to pay off the SBA 7(a) loan early, and in 2023 she received another SBA 7(a) loan. She used the second loan for working capital and to refinance existing debt to help fuel the business's growth.

Today, the business has more than 160 employees working at military bases across 11 states. Bailey's Premier Services has also expanded its operations internationally, including offering services in the United Kingdom.

- and non-biodegradable), spray paints, or artificial dyes Buys recycled office paper
- safe cleaning supplies

Office Renovations:

- Repurposed horse shed for design studio
- Installed compost toiletInstalled ENERGY STAR walk-in cooler

CASE STUDY

Capitol Bowl West Sacramento,CA

Remodeling Efforts 'Strike' Results in Energy

Built in the 1950s, but newly remodeled, the owners of Capitol Bowl have taken steps to attract more customers and lower their carbon footprint. Capitol Bowl's activities include open bowling, organized leagues, birthday parties, and company celebrations. The restaurant in the facility prepares everything from scratch and is open for lunch and dinner. In the past three years, the owners have transformed an old, inefficient building into an energy-smart, water conserving, beautiful bowling center and restaurant.

Capitol Bowl remodeled the inside of their building, which contained little rooms built inefficiently. To reduce trash and keep Styrofoam® out of the landfill, they stopped using disposable plates and utensils, and switched from Styrofoam® to cardboard takeout containers. They then remodeled the outside of the building to include a patio with a xeriscape garden and added blinds on the windows to help keep the interior cooler. In 2014, Capitol Bowl took their efforts up a notch by adding rooftop solar, switching the parking lot lights to LED, and starting a water conservation program.

Capitol Bowl has implemented a number of sustainability initiatives to become a CoolCalifornia Climate Leader Award winner

BUSINESS SNAPSHOT

Capitol Bowl is a small, family-owned bowling center with a full-service restaurant

Green Actions and Renovations:

- Supply reusable food serviceware Switched from Styrofoam® to cardboard take-out containers
- Installed signage reminding customers and employees to
- conserve water and recycle

 Created a xeriscape garden in patio dining area
- Installed energy-efficient blinds
 Installed photovoltaic (PV) rooftop solar
 Installed energy efficient appliances
 Installed LED parking lot lights

Cost Savings:

• Saves about \$5,200 a month after adding PV solar panels and LED lighting to their facility
