New plan to accelerate California high-speed rail construction deserves attention, support

Construction of the High-Speed Rail going over the San Joaquin River along Highway 99 in north Fresno on March 3, 2023. Photo by Larry Valenzuela, CalMatters/CatchLight Local

[Article originally appeared in https://calmatters.org]

By Ray LaHood

California's high-speed rail project, news coverage has largely focused on the attempt to disrupt the project. Meanwhile, almost no one is talking about the California High-Speed Rail Authority's aggressive new leader and his dramatic efforts to accelerate construction of the bullet train.

Ian Choudri, the new CEO for the agency responsible for realizing the project, has spent decades working on major rail projects for major construction, engineering and high-speed train manufacturing firms. He believes there is a need for sweeping change at the authority.

As a first step, Choudri is transforming the organization's culture to focus on results while eliminating overlapping roles and responsibilities. He is also going over all of the project's existing plans with a fine-toothed comb in order to reduce costs while also examining strategies to raise additional revenues. That includes potential monetization of surplus real estate, fiber networks and advertising space.

While the goal in recent years has been to focus resources on building an early operating line in the Central Valley, Choudri has set his sights higher. The goal of launching high-speed train service in the Central Valley in the early 2030s remains the same, but Choudri also wants to simultaneously begin construction on extensions into the major population centers of San Francisco and metro Los Angeles within the next few years.

Construction will begin on a line running northwest into the Silicon Valley that will plug into the Caltrain commuter rail system that connects to San Francisco. Construction will also start on a line heading south into northern L.A. County that connects with Metrolink commuter rail service to downtown Los Angeles, as well as the High Desert Corridor and Brightline West highspeed rail systems running northeast to Las Vegas.

This will connect the budding high-speed rail network into the busy regional transit systems of California's biggest metro areas, and in doing so, begin to deliver on long-promised mobility, economic development, housing affordability and climate benefits — not to mention profitability. It will also put the project within striking distance of its ultimate goal: a one-seat ride between downtown San Francisco and downtown Los Angeles in under 3 hours

What's needed to deliver this plan is stable funding. The project has suffered from unpredictable, stop-and-go funding from the outset — a reliable driver of recurrent cost escalations. If stable

Mayor Bass Marks Beginning of Construction to Rebuild Homes In the Palisades Months Ahead of Expectations

[Article originally appeared in https://mayor.lacity.gov]

Three months after the start of the fires, Los Angeles Mayor Karen Bass today highlighted the start of the rebuilding process in the Palisades, visiting two different sites that have been issued building permits from the City. The first permits were issued 57 days after the Palisades Fire began. The first permits took more than twice that time to be issued after both the Camp Fire (123 days) and the Woolsey Fire (230 days). Mayor

Bass has taken emergency executive action to cut through red tape and expedite every aspect of the disaster recovery effort, which is now considered the fastest in modern California history.

"This community is resilient – and today is yet another example of that. This is the result of urgent work to build this community back faster than any disaster zone in recent history," said Mayor Karen Bass. "We've slashed red tape and accelerated building processes to ensure that nothing stands in our way."

Recovery progress and actions taken to date:

As of this morning, more than 360 properties

have had debris completely cleared and have re-

ceived final sign off – a required step for permits

to be issued. The debris removal process began

just 35 days after the fires ignited — roughly half

the time it took after the devastating 2018 Wool-

- Fastest Hazardous Materials Clearing in EPA History: Thanks to President Trump and the Trump administration, Phase 1 of the debris removal finished in 28 days months ahead of expectations and removed more than 300 tons of hazardous materials, such as exploded lithium ion batteries, from the Palisades. In comparison, Phase 1 of the debris removal process for the devastating Camp Fire in Paradise, California took more than twice as long to complete.
- Debris Removal Moving at Historic Pace: Phase 2 of the debris removal process is well underway and began just 35

- days after the fires ignited roughly half the time it took after the devastating 2018 Woolsey Fire.
- Utilities Restored at Record Rate: In just two months, water and power were safely restored for standing homes in the Palisades. In comparison, safe drinking water wasn't restored until 18 months after the devastating Camp Fire in Paradise, California.
- Emergency Executive Orders to Return and Rebuild: Mayor Bass used her executive power to cut through red tape, help relocate impacted schools and childcare facilities, provide tax relief for small businesses, expedite the rebuilding of homes and businesses in ways that better protect against future wildfires, and more. The first permits were issued 57 days after the Palisades Fire began. The first permits took more than twice that time to be issued after both the Camp Fire (123 days) and the Woolsey Fire

Building a Toolkit for Women in Construction: A Q&A With Women at BELL

A panel of women at BELL Construction share their insights and answer questions to inspire the next generation of female leaders in construction.

[Article originally appeared in www.constructionexec.com]

By Alexzondra Fleetwood

The construction industry offers a world of opportunities for young women, but navigating the path to success can feel daunting. While men are traditionally associated with the field, many talented women are eager to pursue construction careers but may be unsure of how to get started.

According to the U.S. Bureau of Labor Statistics, the construction industry is projected to experience a substantial 5% job growth over the next eight years, significantly outpacing the average growth rate across other industries. Now is the prime time for women to enter and build careers within the expanding field.

Construction Executive asked the women at BELL Construction about their experiences and advice for the next generation. They didn't shy away from the realities of working in construction, how to build credibility in the field and what leaders can do to create more opportunities for women. Success in construction, like any great project, starts with the right tools. Here are lessons learned by real women in construction project management, administration and engineering:

WHAT MAKES CONSTRUCTION A GREAT CAREER CHOICE FOR WOMEN?

Luci Porter, executive administrator: Construction is an excellent career choice for women because of the wide range of roles and opportunities available. Even if you're not on the jobsite every day, your contributions are still essential to a project's success. When I was exploring a new career path two years ago, I was encouraged by women already working in construction. I know that my work behind the scenes—supporting the executive team, managing scheduling and keeping our office running smoothly—makes a big difference across the business and on the ground.

Melissa Higginbotham, senior recruiter: Construction is a diverse industry with many different roles and niche specializations, allowing women to find a career path that aligns with their unique skills, interests and personality. Through my experience at BELL, I've seen firsthand how vital every role is—from the trades to project

management and corporate positions. Just as it takes a village to build, it also takes a variety of perspectives and talents to keep the industry moving forward. This diversity of opportunities also provides room for career growth, allowing women to pivot into different roles as they develop their skills and experience.

Caroline Blackstone, assistant superintendent: Construction is a great career choice for women because it provides opportunities to help develop younger generations. By sharing knowledge and experiences, women can play a key role in shaping the careers of those just starting out, helping them navigate challenges and grow within the industry. This mentorship and the chance to make a lasting impact is one of the most rewarding aspects of a career in construction.

WHAT IS THE BEST FIRST STEP FOR YOUNG WOMEN INTERESTED IN JOINING THE CONSTRUCTION INDUSTRY?

Tara Runion, project manager: The best first step to joining the construction industry is to build a strong foundation of knowledge and experience. A construction management degree is a common route, but it's not the only one. I majored in project management through my

university's business college, which gave me a well-rounded view of all parts of a project, including accounting, marketing, HR, communications and business law. Consider internships or apprenticeships to explore different roles and responsibilities. This can help you determine which path excites you most.

Ellie Quinn, project engineer: There are two main ways to get into construction: education and experience. I took both routes by working in the field before enrolling in a construction management program at Louisiana State University. It's important to choose what works best for where you are in life. Education provides a solid foundation, but gaining hands-on experience is just as valuable.

I also recommend networking and starting conversations. People are often willing to help, so reach out through calls, emails or even social media. Talking to different people can help open doors, and if construction is the goal, opportunities are out there.

Caroline Blackstone, assistant superintendent: The best first step for young women interested in joining the construction industry is to explore different opportunities and take that first leapwhether through an introductory class, a handson experience or simply connecting with industry professionals. Opportunities in this field are within reach for those willing to pursue them, and sometimes discovering the right path starts with just one conversation or experience.

WHAT ARE THE BEST WAYS FOR YOUNG WOMEN TO GAIN HANDS-ON EXPERIENCE IN THE INDUSTRY?

Tara Runion, project manager: Young women can gain valuable experience through internships, apprenticeships or volunteering with organizations like Habitat for Humanity. Joining associations like the National Association of Women in Construction or attending conferences are also great ways to build skills and confidence. These experiences provide exposure to different areas of the industry and can help women find what they're passionate about and boost confidence. That's essential for making it in construction

HOW CAN YOUNG WOMEN GAIN EXPOSURE TO THE DIFFERENT CAREER PATHS WITHIN CONSTRUCTION?

Melissa Higginbotham, senior recruiter: Exposure to different career paths in construction begins with education, mentorship and handson experience. Success in this industry relies on passion and commitment, and the right resources can make all the difference. At BELL, we empower young students and women by sharing our journeys, building connections and guiding them to the many opportunities available. Through partnerships, mentorships and community outreach, we aim to inspire the next generation to pursue rewarding careers in construction and turn aspirations into reality.

WHAT KEY FACTORS SHOULD YOUNG WOMEN CONSIDER WHEN CHOOSING A CONSTRUCTION TO WORK FOR?

Luci Porter, executive administrator: For me, company culture and opportunities for growth were crucial factors. At BELL, there is a strong focus on personal development, and the company provides the tools and support needed for success. Our leaders also take notice when great

ractor Solicitation of Interest

WRD Torrance Groundwater Desalter Expansion Project – GMP 1 BID DUE DATE & TIME: April 25, 2025 at 12:00 PM PST.

McCarthy-Jacobs a Joint Venture(Design-Builder) is soliciting interest from qualified subcontractors and suppliers to participate in the bidding phase of the project.

Project description: The Torrance Groundwater Desalter Expansion (TGDE) Project will improve and expand on the Goldsworth Desalter that has been treating groundwater for potable use. The TGDE will increase the capacity of the facility to 7.2 MGD and w Desalter that has been treating gro include the following components

New reverse osmosis (RO) pretreatment system including automatic backwashing strainers (ABS)

- · Addition of two new RO skids
- · Modification of the chemical facilities to accommodate the expanded plant capacity
- · Construction of a new finished water clearwell
- Repurpose of the existing clearwell as a neutralization basin
- · Addition of four new wells and the implementation of the existing Brewer Well
- New concentrate wetwell, pump station, and pipeline
- New finished water pipeline

Project Location: 20500 Madrona Avenue, Torrance, CA 90503

Work categories include: Electrical; Concrete Paving; Site Concrete; Pavement Markings; Water Well Drilling & Development

Key Subcontractor Qualifications: Experience with water/wastewater projects

Key Dates: Request for Proposals (RFP) issued to Subcontractors - 03/24/25 via Building Connected website; Proposals Due to McCarthy Building Companies - 04/24/25

This project requires:

- Prevailing Wages
- Project Labor Agreement (PLA)

McCarthy-Jacobs is an equal opportunity employer and encourages qualified Small Business and Minority Business participation All qualified applicants will receive consideration for employment without regard to race, religion, sex, or national origin.

Please contact us if you have any questions regarding project specifics:

Mass. Electric Construction Company Bid Solicitation for LACMTA Metro A & B Lines Communication Transmission System Upgrade

Company: Mass. Electric Construction Company (MEC)

Owner: Los Angeles County Metropolitan Transportation Authority (LACMTA)

Project: Metro A & B Lines Communication Transmission System Upgrade (IFB No. C129803C1237)

Mass. Electric Construction Company (MEC) is assembling a team to respond to the invitation for bids issued by the Los Angeles County Metro Transportation Authority (LACMTA) to provide Furnish, Install and Commissioning services for the Metro A & B Lines Communication Transmission System (CTS) Upgrade Project.

The project will involve furnishing materials, installation, testing and commissioning Fiber Optic Cables (CTS) system for network connectivity along A Line South (Metro Blue Line), B Line Seg-1, Union Station Gateway (USG) building and MCP (New Security Center).

MEC is actively soliciting bids from firms interested in subcontractor / supplier opportunities on the Project (upon award to MEC).

Bids due to MEC April 28, 2025 by 12pm PDT.

Anticipated opportunities include (but are not limited to):*

Vendor/Supplier: Fiber Connectivity Materials, Microduct, Microfiber, PVC Conduit, Rigid Conduit Subcontractor: Maintenance of Traffic (MOT)

*Contract opportunities are contingent upon project award to MEC.

Associated NAICS codes include: 238210, 238990, 335921, 335929, 335999, 423610, 423690, 561990

BIDS DUE TO MEC APRIL 28, 2025 BY 12PM PDT

MEC utilizes BuildingConnected for bidder communications regarding plans/specs and addenda distribution.

ACCESS SCOPE PACKAGE DETAILS IN BUILDINGCONNECTED

1. Set up a free BuildingConnected account at: https://app.buildingconnected.com/create-account.

 $2.\ Visit\ the\ project\ Building Connected\ site\ at:\ \ \underline{https://bit.ly/MEC-MetroCTSBids}$ 3. Use the "Join" buttons on the right of the scope package to access scope details,

download files, and communicate with the project team.

Subcontractors and suppliers, especially including those certified as a Small Business Enterprise (SBE) by LACMTA or BART, firms certified as a Disabled Veteran Business Enterprise (DVBE) and/or certified as a Local Small Business Enterprise (LSBE) by the California Department of General Services (DGS) are highly encouraged to submit bids

For questions, email: Dylan.Shiao@kiewit.com MEC is an Equal Opportunity Employer.

CONSTRUCTION TECHNOLOGY

Why Contractors Nearing Retirement Must Embrace Al

[Article originally appeared in www.constructconnect.com]

By Maila Kim

Every contractor wants to leave their business in good hands. For those thinking about retirement, this is even more important. With over 41% of the construction workforce expected to retire by 2031, the industry is facing a serious skills gap.

But here's the good news. Artificial intelligence (AI) and digital solutions can help experienced contractors share their knowledge and prepare the next generation to succeed. Using AI today means your business can stay strong—even after you retire. It's a step in the right direction for those planning to retire.

The Problem: A Growing Knowledge Gap in Construction

There are two big challenges in construction today:

- 1. Older workers are retiring. One in five construction workers is currently 55 or older. In the next 5 to 10 years, many will leave the workforce, taking their experience with them.
- 2. There aren't enough new workers. The industry needs to hire 439,000 new workers this year to meet demand. Many younger people like working with technology, but the construction industry has been slower to adopt it.

If your business doesn't have a way to share knowledge, all the experience your business is built on could be lost. But if you start using AI and other digital solutions now, you'll stand out—and you'll attract new talent who want to work with modern construction technology.

The Solution: Use Technology to Pass Down Knowledge

Document and Automate Workflow

By adopting AI and other digital solutions, businesses can document workflows and build on their legacy. This is possible through:

Documenting important information.
 Digital tools keep a record of business processes. It keeps information such as key contacts and project details from getting

lost in binders, sticky notes, or scattered files. That means future employees can access a library of knowledge all in one place.

- Automate tasks. AI-assisted software can handle repetitive tasks. It makes your day easier and more efficient. With more time, you can focus on strategic tasks for your business.
- 3. Preconstruction software. Tools like ConstructConnect® Project Intelligence and Bid Management help contractors find jobs, organize bids, and track contacts—all in one digital place. This creates a smart, searchable library your team can use.

Without digital solutions, it's easy for valuable knowledge to disappear when someone leaves the business.

Make Takeoff and Estimating Easier

Takeoff and estimating are important parts of the job. But they can be tricky and take a long time to learn. AI-powered tools can do the early work—like measuring and calculating—so your team can focus on more important things.

This helps experienced estimators spend their time bidding and winning work. It also helps newer team members learn faster and get better at estimating.

Jerry Chandler, owner of Advanced Demolition, LLC, saw this firsthand. He explained how Plan-Swift®, a digital takeoff and estimating software, has helped his business:

"PlanSwift means more productivity to me and my business... I've been able to bring my son into the business and after a couple of weeks have him online up to speed doing good quality take-offs because it was that easy to use."

Jerry's use of PlanSwift software is a great example of how technology bridges the generational gap—and how an experienced professional could share his knowledge faster and more effectively.

Takeoff BoostTM, an AI-assisted feature of On-Screen Takeoff, is another example of a tool helping to bridge the gap. It gives users a head start by doing the first takeoff for them. Then they can check it and adjust. This can make takeoffs up to 40% faster. By using AI tools like this, you're not just keeping up—you're staying ahead in a fast-moving industry.

Building a Toolkit for Women in Construction

Continued from page 2

work is done. I was promoted in just a year, and I'm proud of the difference I'm making in my new role.

Above all, our company values safety, integrity, commitment and work-life balance, all of which are important to me in a workplace.

WHAT SKILLS OR CERTIFICA-TIONS CAN HELP YOUNG WOMEN STAND OUT IN THE CONSTRUCTION INDUSTRY? Tara Runion, project manager: Women in construction must be confident. I work with many men on the jobsite, and confidence helps show competence, navigate challenges and break down barriers. Confidence isn't just about self-assurance, it's about showing up as a leader, in meetings and in interactions with clients and colleagues. To stand out, women should also focus on building their skills and leadership abilities. Certifications like OSHA-10 or Project Management Institute's Certified Associate in Project Management can help build credibility and demonstrate expertise. By combining confidence with these skills,

women can make a lasting impact, advance their careers and inspire others.

WHAT NETWORKING OPPORTUNITIES OR PROFESSIONAL GROUPS WOULDYOU RECOMMEND FOR WOMEN IN CONSTRUCTION?

Ellie Quinn, project engineer: I recommend joining groups like NAWIC and Associated Builders and Contractors for valuable networking opportunities. NAWIC meetings are well-attended and provide a supportive environment where women share their experiences and support each other. NAWIC also offers

scholarships for women pursuing undergraduate degrees in construction-related fields, making it a great resource for both professional development and financial support.

Eva James, project engineer: Networking is essential to build relationships with clients and subcontractors. Two of the best groups to consider are NAWIC and ABC, both of which offer excellent networking opportunities and resources.

8 SMALL BUSINESS EXCHANGE APRIL 17, 2025 - APRIL 23, 2025

Markey, Schumer, and Small Business Democrats urge SBA to help.

[Article originally appeared in www.sbc.senate.gov]

Ranking Member Edward J. Markey (D-Mass.) and Democratic Leader Chuck Schumer (D-N.Y.) today led the Democrats on the Senate Small Business and Entrepreneurship Committee in writing to U.S. Small Business Administrator Kelly Loeffler to take immediate action to address the impacts of Trump's reckless tariff policies on small businesses. Administrator Loeffler has the critical responsibility of protecting the interests of the country's more than 34 million small businesses, and Trump's tariffs and trade policy are endangering the livelihoods of the entrepreneurs who are the backbone of our economy.

In the letter the lawmakers write, "The situation is dire. From mom-and-pop restaurants unable to afford basic supplies like cooking oil to small manufacturers and high-tech startups struggling to afford the raw materials needed for innovation, small businesses across all sectors are facing the same crippling reality. As these costs rise, consumer confidence continues to plummet, and the economy stagnates. A survey by Small Business for America's Future found that 71 percent of small businesses will need to increase prices to survive, but with consumer confidence at its lowest since the pandemic, many owners know their customers cannot afford higher prices. The tariffs, therefore, are not only increasing costs, but also are undermining the very demand from customers that small businesses rely on."

The lawmakers continue, "Failure to act will not only jeopardize the livelihoods of small business owners but may also lead to long-term financial hardship for the 60 million workers employed by small business - especially those working paycheck to paycheck who cannot afford to be laid off or have jobs delayed or denied. Indeed, American small businesses and workers are falling behind, and more must be done to support domestic manufacturing and small businesses by fixing our broken tax code, investing in our supply chains, and training a skilled workforce. Without these investments, we are only doing a disservice to millions of working families and small businesses caught in the crosshairs of this trade war. Suggesting that small businesses can easily pivot to new suppliers is not only ignorant but dangerous."

The lawmakers conclude, "We urge you to take swift action to ameliorate the damage being inflicted on small businesses by the President's tariff policies, combined with the chaos of cuts to federal services and investments that small businesses rely on. As a representative of millions of entrepreneurs who are on the brink of disaster and the voice of small businesses in the administration, you have an obligation to fight for their survival. Your leadership is crucial in ensuring that the concerns and struggles of small business owners are heard and that tangible solutions are implemented to protect them from the devastating effects of Trump's trade war. America's small businesses—and the workers they employ—are counting on you to take action before it is too late.'

Mayor Lurie, Supervisors Announce Legislation for Neighborhoods and Small Businesses

[Article originally appeared in www.sf.gov]

Mayor Daniel Lurie announced new legislation to continue driving San Francisco's economic recovery by supporting neighborhoods and local businesses by creating five new entertainment zones. Co-sponsored by District 3 Supervisor Danny Sauter, District 6 Supervisor Matt Dorsey, and District 9 Supervisor Jackie Fielder, and set to be introduced tomorrow, the legislation builds on the success of entertainment zones downtown and, most recently, in the vibrant Cole Valley commercial corridor and on Front Street.

"Our city's recovery depends on neighborhoods, people, and bringing joy and life back to our streets—block by block. That's what entertainment zones do, and that's why we are excited to be creating five new ones," said Mayor Lurie. "From Cole Valley to Front Street, we've seen what happens when we open up our streets: Foot traffic goes up, local businesses get a boost, and neighbors come out to connect. I want to thank Supervisor Dorsey, Supervisor Sauter, and Supervisor Jackie Fielder for co-sponsoring this legislation and all of our partners in these communities for working hand-in-hand with our administration to bring our city back."

"Entertainment Zones are a proven approach to support small businesses and our art and nightlife communities," said District 3 Supervisor Danny Sauter. "Today's introduction of key new Entertainment Zones means that more residents and tourists alike will see San Francisco at our best through active open spaces filled with joy, creativity, and community."

"These new Entertainment Zones are about bringing joy, energy, and economic vitality back to our neighborhoods," said District 6 Supervisor Matt Dorsey. "From the heart of downtown on Yerba Buena Lane to the nightlife corridor of Folsom Street in SoMa, we're creating welcoming spaces that support small businesses, celebrate our culture, and bring people together."

Mayor Lurie and the Board of Supervisors are taking major steps to support small businesses downtown and across the city. Most recently, Mayor Lurie and Supervisor Stephen Sherrill announced legislation to renew the First Year Program, which has helped thousands of small businesses open their doors by waiving fees in their first year.

Construction to Rebuild Homes In the Palisades Months Ahead of Expectations

Continued from page 1

(230 days).

- Reinforced Burn Areas Prone To Slides: The City shored up burn areas ahead of wet weather this season by urgently installing more than 10,000 feet of concrete barriers and laying down more than 6,500 sandbags.
- Provided Relief and Protections to Fire
 Survivors:
- Opened a Disaster Recovery Center to centralize critical resources from 70 city, county, state, and federal agencies. More than 9,500 households and counting have been helped so far.
- Opened the One-Stop Rebuilding Center to help streamline the rebuilding of homes and
- Worked with the Governor's Office to ensure homeowners can access as-built plans and allow the City to automatically re-issue permits for homes built in recent years.
- Opened four new Impacted Worker and Family Recovery Centers to help residents with job placement, financial assistance, youth opportunities, and more.

Signed new City ordinances to:

- Deliver tax relief for local businesses that were destroyed or severely economically impacted by the wildfires.
- Prohibit residential evictions for tenants housing people or pets displaced by the wildfires for the next year.
- Prohibit price gouging for essential housing, lodging, and consumer goods and services, including contractor services for debris removal and rebuilding, during a declared state of emergency.
- Brought Helpful Information Directly to the Palisades Community: The Office of Mayor Bass hosts virtual community brief-

ings every week, each attended by hundreds of Angelenos, to share information on recovery and rebuilding.

Federal and State Support: Mayor Bass led a Council delegation to Sacramento to advocate for support to rebuild. The delegation met with Governor Gavin Newsom, California State Senate President Pro Tempore Senator Mike McGuire, California State Assembly Speaker Robert Rivas and other state leaders.

New plan to accelerate California high-speed rail construction

Continued from page 1

funding paired with a state backstop can be guaranteed for years to come, construction can proceed along the entire 300-mile stretch between Silicon Valley and L.A. County within the next few years

Choudri has secured private funding for rail projects in the past, and believes he can secure billions of dollars in private investment in the California project in the near-term. But the key to unlocking these private dollars is first securing a fixed level of funding, year-in and year-out, from the state government.

High-speed rail currently receives 25% of the revenue from the state's annual cap-and-trade program. The revenues vary from year to year as the market-determined price of carbon fluctuates, with the allocations toward the high-speed rail project ranging anywhere from \$750 million to \$1.25 billion. This year state legislators began debating what the next version of the program

will look like if it's reauthorized beyond 2030, creating uncertainty about the project's most consistent funding source.

Private investors are loath to invest in projects with this level of funding volatility. It's similar to qualifying for a home mortgage: Without steady income, an individual can't qualify for a loan.

If the Legislature carves out a robust, fixed-dollar amount for California high-speed rail moving forward, paired with a state backstop, Choudri believes he can leverage this income stream to secure billions in private financing and fill the remaining funding gap.

The authority now has a credible plan to accelerate construction of the bullet train. What the clear majority of California voters who want high-speed rail need is a serious commitment from the California Legislature to put America's most important infrastructure project into overdrive

PUBLIC LEGAL NOTICE ADVERTISEMENTS

OAKLAND UNIFIED SCHOOL DISTRICT DEPARTMENT OF FACILITIES PLANNING AND MANAGEMENT

 $\frac{REQUEST\ FOR\ QUALIFICATIONS}{AND\ PROPOSALS\ (RFQ/P)}$

Solid Waste Handling and
Recycling & Composting and Prevention Services
April 16, 2025 (Issued)

Responses must be received by May 1, 2025, no later than 2:00 p.m. (Pacific time)

The Oakland Unified School District ("District") is requesting proposals from experienced firms, partnerships, corporations, associations, persons or organiza-

tions ("Contractors") to furnish to the District solid waste handling services that include landfill, recycling and compost services, direct support to assist our schools sorting program preparation, education, and implementation that builds off of our comprehensive Waste Prevention Program and hosting an Annual Career Day.

Interested firms are invited to submit a completed Statement of Qualifications ("SOQ") along with the Fee Proposal (collectively "RFQ/P Packet") as described below, with one (1) unbound wet-signed original, five (5) bound copies and a PDF version on a flash drive of requested materials with the cover letter addressed to:

Oakland Unified School District Roland Broach, Executive Director of Custodial Services & Grounds Department of Custodial Services 900 High Street, Oakland, CA 94601

Oral, telegraphic, facsimile, telephone or email RFQ/P Packets will not be accepted. RFQ/P Packets received after this date and time will not be accepted and returned unopened. The District reserves the right to waive any informalities or irregularities in the RFQ/P Packets. The District also reserves the right to reject any and all RFQ/P Packets and to negotiate contract terms with one or more Respondents.

If you have any questions regarding this RFQ/P please email Kechette Walls at kechette.walls@ousd.org, Juanita Hunter at Juanita.hunter@ousd.org and Colland Jang at colland.jang@ousd.org.

LOCAL, SMALL LOCAL, AND SMALL LOCAL RESIDENT BUSINESS ENTERPRISE PROGRAM

The services requested in this RFQ/P is exempt from the District's LBE/SLBE/SLRBE requirements due to the services being funded by the District's General Fund (Fund 1).

SONOMA-MARIN AREA RAIL TRANSIT

Solicitation Title: Request for Qualifications for the Healdsburg Extension Project

Solicitation Number: CV-DB-25-001

Project Owner: Sonoma-Marin Area Rail Transit (SMART)

Project Description: Design and Construction of Civil, Structures, Systems, and Architectural Improvements for the Healdsburg Extension Project. The Healdsburg Extension Project is the extension of the SMART railroad and pathway system with the objectives of extending passenger rail service 9 miles to the North, constructing a station in the City of Healdsburg,

CA, and extending the non-motorized pathway from the Town of Windsor to the City of Healdsburg where it will tie into the existing Foss Creek pathway within the railroad right-of-way.

Work includes, but is not limited to replacement of the existing track with new track, ties, ballast, and sub ballast; construction of a new center boarding platform to include SMART standard amenities, shelters, lighting, CCTV security cameras, card vending machine(s), real-time passenger signs, etc.; several bridge replacements or refurbishments, including a significant bridge crossing the Russian River; all new and existing grade crossings to be reconstructed, construction of a non-motorized bicycle and pedestrian pathway from Windsor to Front Street in Healdsburg, extension of

SMART's existing Enhanced Automatic Train Control (EATC) train control system, extension of SMART's communication system to support a closed SMART network communication system, etc.

Optional tasks are also included in this solicitation to further extend SMART's rail and pathway system North towards Geyserville, CA. Similar work elements to that of the Healdsburg Extension Project are included in these work tasks.

Project Delivery Method: Progressive Design-Build Alternative Delivery Method

Engineer's Estimate: \$263,000,000.00

Funding Source: Federal Railroad Administration

(FRA) Funds, State of California Funds, and Local Measure O Funds

Pre-Proposal Conference: April 14, 2025 at 1:00 p.m. (Pacific), RSVP Requested

Proposals Due: June 30, 2025, by 2:00 p.m. (Pacific); Electronic Submission Only.

Contractor's License Required: Type A – General Engineering Contractor

Department of Industrial Relations (DIR): Active Registration Required

Register & Download Bid Documents at: https://sonomamarintrain.bonfirehub.com

UNIVERSITY OF CALIFORNIA, IRVINE MEDICAL CENTER

REQUEST FOR QUALIFICATIONS FOR CONSTRUCTION MANAGEMENT SERVICES

Under the guidelines of CA Public Contract Code 10510.4 – 10510.9, the University is seeking one (1) best qualified firm with experiences in healthcare facilities to provide Construction Management Services to support NPC/SPC seismic, Material Testing and related projects at the UCI Health Community Network Hospitals.

The best qualified consultant will provide construction management services for seismic & related projects in conformance of Structural and Non-Structural Performance for the four UCI Health Community Hospitals: (1) Fountain Valley Regional Hospital, (1) Lakewood Regional Medical Center, (1) Los Alamitos Medical Center and (1) Placentia-Linda Hospital.

Services may include, programming review, estimating, scheduling, constructability review, design management, project management, preparation of bid documents, bid review, contactor outreach, construction administration, change order negotiations and project close out.

Construction Management services will be authorized on an "as-needed" basis and are contingent upon project approvals, funding and the quality of services delivered by the design professional.

Est. Contract Value: \$650,000 or greater

TO OBTAIN RFQ PACKET (REQUIRED FORMS), email Maryann Gonzales @ maryacg1@hs.uci.ed or Kim Kerwin at khau@hs.uci.edu.

Address (1) original, (2) hard copies and an electronic copy in USB of the qualification submittal to Maryann Gonzales, UCIMC Planning, Design & Construction, 101 The City Drive South, Bldg. 27, Rte. 131; Orange, CA 92868.

Deadline for RFQ submittal is May 7th, 2025 @ 2:00 PM.

Every effort will be made to ensure that all persons shall have equal access to contracts and other business opportunities with the University, regardless of: race; color; religion; sex; age; ancestry; national origin; sexual orientation; physical or mental disability; veteran's status; medical condition; genetic information; marital status; gender identity; pregnancy; service in the uniformed services; or citizenship within the limits imposed by law or University's policy. The selected consulting firm will be required to show evidence of their Equal Employment Opportunity policy.

12 SMALL BUSINESS EXCHANGE APRIL 17, 2025 - APRIL 23, 2025

SUCCESS STORIES

Exit Bliss Consulting: Empowering Businesses to Thrive Through Transitions

Exit Bliss Consulting, Gloria Coleman

[Article originally appeared in www.score.org]

Exit Bliss is a succession planning and operational process improvement consultancy dedicated to helping organizations navigate transitions with clarity and confidence. We specialize in streamlining back-office systems, preserving organizational legacy, and equipping businesses with the tools they need to thrive through change. Whether it's succession planning, process improvement, or strategic planning, our goal is to reduce chaos, bring order, and ensure every transition is smooth and successful.

At Exit Bliss, we offer tailored services for businesses of all sizes. For large entities, we provide leadership workshops, executive coaching, community outreach, and comprehensive organizational assessments. For small businesses, we focus on services like creating standard operating procedures, developing business roadmaps, productivity system setups, and vendor management. We also offer governance, compliance, and documentation support to keep businesses running smoothly. No matter the need, we create

customized solutions that align with our clients' goals and learning styles.

What truly sets Exit Bliss apart is our people-centered approach. We don't just offer solutions—we offer guidance, coaching, and support tailored to the unique needs of each business. We take the time to understand our clients' challenges and provide services that fit their specific learning styles, whether they're visual, auditory, or hands-on learners. Our ability to combine efficiency with empathy ensures that we're not just fixing systems; we're empowering the people behind them.

What inspired you to start your business?

The inspiration for Exit Bliss came from my own experiences witnessing the chaos businesses face during transitions. I've seen firsthand how lack of preparation, systems, and support can derail even the best organizations. It's not just about losing efficiency—it's about losing the legacy, the mission, and the vision that so many people have worked hard to build.

Tech Innovators: EcoGrowth Labs of San Francisco

[Article originally appeared in https://blog.allaboutthebay.org]

EcoGrowth Labs, nestled in the heart of San Francisco, stands as a testament to innovative environmental stewardship in the Bay Area. Founded by environmental scientist Dr. Maya Edwards, this pioneering lab serves as a center of research, development, and education, striving to push the boundaries of sustainable practices and green technology.

Dr. Edwards, an advocate for eco-friendly solutions, envisioned a platform where her team

could delve into groundbreaking research on renewable energy sources, environmental preservation, and waste management. Their work has attracted attention from various sectors, from government initiatives to private enterprises, all seeking forward-thinking strategies to mitigate their carbon footprint and promote eco-conscious practices.

EcoGrowth Labs operates as a beacon of change, inviting local businesses and aspiring eco-entrepreneurs to their workshops and seminars. Here, Dr. Edwards imparts her vast knowledge on sustain-

able methodologies, fostering discussions about the urgent need for innovative solutions in the fight against climate change. These events often lead to meaningful conversations about the implementation of eco-friendly practices, drawing in the community's forward-thinkers and fostering a network of green enthusiasts committed to change.

Notably, the lab has initiated several partnerships with local schools and community centers, encouraging the younger generation to engage in eco-awareness programs. From hands-on experiments in renewable energy to educational seminars on environmental preservation, EcoGrowth Labs is actively nurturing an environmentally conscious community.

Ultimately, EcoGrowth Labs stands as a light-house for those seeking innovative solutions in sustainability. Its mission is not just research and education; it's a catalyst for change, promoting a greener tomorrow and inspiring individuals to take actionable steps toward a more sustainable, eco-friendly future.

Harbor Bikes

[Article originally appeared in https://blog.allaboutthebay.org]

Harbor Bikes, a quaint bike shop located in the heart of Sausalito, epitomizes the quintessential Bay Area spirit of adventure and eco-friendly commuting. The brainchild of cycling enthusiast and eco-entrepreneur Mark Thompson, Harbor Bikes offers an eclectic selection of top-quality bikes, accessories, and expertise to the local community.

Mark, a dedicated advocate for sustainable transportation, envisioned a space where residents and tourists could find more than just a standard bike shop. Harbor Bikes is more than a retail establishment; it's a hub where cycling enthusiasts and novices alike congregate to discuss, learn, and foster a love for biking as an eco-friendly alternative for commuting and leisure.

The shop organizes various events, from weekend group rides to informative sessions on bike maintenance and eco-friendly commuting.
