# **Unprecedented Times: An Interview Panel With 2025 Top Construction Law Firms**

[ Article originally appeared in www.constructionexec.com ]

### **By David McMillin**

In a typical year, construction law doesn't change all that much—but so far, 2025 has been anything but a typical year. Before the Trump administration reached its first-100-days mark, attorneys were already combing through the language of nearly 130 executive orders. While executive orders are nothing new—President Biden signed more than 160, and President Trump signed more than 200 in his first term—many of the recent actions are fundamentally changing the way that construction firms operate.

How should you manage an uptick in uncertainty? Which cases are moving through the courts that could impact your jobsites? And what can you do to increase your odds of avoiding mediation, arbitration or litigation? There are no easy answers to any of these questions, but following the lead of some of the industry's brightest legal minds—all of whom practice among CE's most recent edition of the Top 50 Construction Law Firms—can put you on a course for success.

### TARIFF TALK

When the Trump Administration unveiled plans to impose a sweeping new set of tariffs in the spring, the vast majority of construction firms felt a figurative crack in their foundations: In April, around 80% of ABC contractors reported that suppliers had notified them of price increases, and nearly 20% of them had projects paused or interrupted. As leaders continue to worry about what those price increases might do

to their business models, they're spending more time talking to their attorneys.

Gary Stein, co-managing partner of Peckar & Abramson's Miami office and a member of the firm's executive committee, says his clients are very concerned. As Stein analyzes the increased tariffs—the majority of which were on a 90-day pause as this issue went to print with a notable exception of a 145% tariff on most Chinese goods—he separates projects into two buckets: those that are under contract and underway to some degree and those that are still being negotiated. In both cases, however, his advice is to "deal with the issue head on with the owner."

"If you have a contract, talk to your client about how best to bring it to the finish line where the owner and the contractor can share in the pain to some degree, despite what the contract may say, to avoid slamming fists down," Stein says. "Without a contract in place, discuss a fair way of dealing with it to try to apportion the risk. It's difficult to do it fairly when you don't know what the full impact is going to be, but the parties should be engaged in trying to do the right thing by each other."

For future contracts, Levy believes that construction parties should work with the developer to protect themselves from the risk of uncapped price escalation. "If we're going to sign a contract on April 15, we can see the price of lumber on April 15 and say that's our benchmark," Levy says. "You can insert a clause that says the contractor will accept the risk of price escalation of 10%, and the owner

# Could California really withhold tax money from the U.S. if Trump cuts federal funds?

[ Article originally appeared in www.calmatters.org ]

### By Levi Sumagaysay, Calmatters

Gov. Gavin Newsom suggested last week that California may withhold taxes it pays to the United States if President Donald Trump slashes federal funding to the state.

It could be another front in the escalating battle between the Trump administration and the Golden State, which are at the moment wrestling over the president summoning the military to handle protests against immigration raids in Los Angeles. But how it would all work — on both sides — is anyone's guess.

CalMatters asked several tax experts to weigh in on how the state could withhold money from the federal government. Most would not comment about what they called a "vague" threat by state officials. But they pointed out that residents and businesses pay state and federal governments directly when they file their income taxes — making it unclear what tax money California could withhold.

Newsom is not suggesting people stop paying their taxes, said Tara Gallegos, a spokesperson for the governor. But she said the state is considering "whether there are potential options that would allow it to retain some of the funding it typically sends the federal government."

She would not provide further details and did not answer CalMatters' question about which of his staff the governor has directed to explore those options.

California's biggest sources of revenue are personal income tax, corporation tax and sales tax, the last of which goes to local and state governments. The state does not handle other excise taxes, such as those from airports, transportation and more, that the federal government receives, according to the Finance Department.

Newsom on Friday also floated on social media the idea that California is a "donor" state and contributes tens of billions of dollars more a year to the U.S. than it gets back, something Gallegos reiterated to CalMatters.

A study by the Rockefeller Institute of Government found that in fiscal year 2021-22, California provided about \$83 billion more to the federal government than it received, nearly three times as much as the next state, New Jersey, which provided about \$29 billion more than it received from the U.S.

In addition, California taxpayers contribute the most of any state to total federal taxes, according to IRS data the state's Finance Department cited. In fiscal year 2023-24, California's total federal taxes were \$806 billion — nearly twice as much as Texas, which contributed \$417 billion, and more than twice the \$384 billion New York contributed.

State Assembly Speaker Robert Rivas also posted on social media last week that California must look at "every option" including withholding tax dollars, saying that "we're the nation's economic engine and the largest donor state, and deserve our fair share." Rivas, a Salinas Democrat, was not available to answer questions, his staff said.

Some people dispute the notion of donor states.

"The governor's long-standing complaint that California is a donor state rings hollow," said Jared Walczak, vice president of state projects for the Tax Foundation, a Washington, D.C.-based right-leaning think tank. "Unless California politicians are questioning the legitimacy of Medicare, Medicaid, and Social Security, the complaint that California residents pay more in federal taxes than they get back is disingenuous."

"Courts have made it abundantly clear that you can't be a conscientious objector to paying taxes," Walczak said.

has to give a change order for anything beyond that." Levy says that contracts should also account for movement in the opposite direction. If, for example, a tariff is suspended and the price decreases. the owner should get a discount. "What's good for the contractor," he says, "should also be good for the owner.

And speaking of good, some members of the industry believe that the tariffs will have positive effects. Ed Seglias, co-CEO and construction partner at Cohen Seglias, points out that there are portions of the building ecosystem that favor the Trump administration's initiatives

"The steel mills and the fabricators have been undercut in pricing by imported steel-particularly from China, Canada or Mexico," Seglias, who also serves as general counsel for the American Institute of Steel Construction, says. "Their cost structure is different due to government support for those industries, and as a result, they're able to sell steel in situations below what a competitive fabricator could produce it for in the United States.'

### Could California really withhold tax money from the U.S. if Trump cuts federal funds?

### Continued from page 1

Courts have also made it tough for the White House to cancel funding.

White House spokesperson Harrison Fields confirmed in an email to CalMatters this week that the Trump administration is reviewing possible wideranging funding cuts to California, as reported last week by different media outlets such as CNN and the Washington Post. But Fields said no decision

has been made, and would not specify which programs are being considered for defunding. In the same email. Fields said the answers were on background or off the record, which he and CalMatters did not agree to beforehand.

H.D. Palmer, spokesperson for California's Finance Department, pointed to the Trump administration's attempt to freeze hundreds of billions of dollars in federal grants and loans, through an Office of Management and Budget memo, which

it then rescinded in late January after public outcry and court orders

"One salient point from our high school civics lessons: The power of the purse doesn't lie with the (presidential) administration," Palmer said.

Palmer provided a list of state programs that receive the most federal funding, which the state is counting on in its current budget. The list includes money for health, education, highway

planning and construction, disaster recovery. grants for the Supplemental Nutrition Assistance Program and more. The biggest is \$100.9 billion for medical assistance programs

He said the White House has yet to provide specifics or answer the following question: "What public policy benefit are you seeking by withholding these federal dollars from California?"
