Gen Z Revitalizes the Skilled Trades Amid Construction Labor Shortages

Image by www.goodwillcentraltexas.org

[Article originally appeared in www.forconstructionpros.com]

By Chase Manning

As Baby Boomers retire, they take with them decades of accumulated skill, leadership and institutional knowledge, and presently, there are not enough new workers to replace them. The National Association of Home Builders (NAHB) reports that the median age of a construction worker has reached 42, about a year older than the national labor force average. Boomers now make up only 14% of the workforce, down from more than 20%in 2019. While Gen X and Millennials together account for about 71% of those employed in the field. Gen Z matches Boomers at only 14%. This data illustrates a critical imbalance: as experienced workers exit faster than younger ones arrive, the industry faces a growing shortage of skilled labor in the building industry.

A Generation Steered Away from the Trades

The roots of the current labor shortage can be traced back several decades. In the 1990s and 2000s, a push to make college the default pathway for students, known as the "college for all" movement, resulted in high schools pulling back

on Career Technical Education (CTE) credits. In time, college aspirations became more common among high school students, resulting in technical and vocational programs losing funding and visibility in secondary education. Data provided by the National Center for Education Statistics (NCES) show that between 1990 and 2009, the average number of CTE credits earned by U.S. graduates fell about 14%.

Even for students who did participate in CTE programs, decades of "college for all" messaging, reinforced by parents and counselors, often steered them away from the trades at graduation. An analysis conducted by Advance CTE found that three out of four CTE students enrolled in college right after high school, believing that success meant earning a bachelor's degree, even if their technical skills were market-ready. The outcome is a limited supply of skilled workers, just as retirements among seasoned tradespeople are accelerating.

Gen Z Shifts the Narrative

After decades of decline in vocational participation, the emergence of Gen Z in the workforce

Shine LA Continues to Empower Residents Across Los Angeles

[Article originally appeared in https://mayor.lacity.gov]

Mayor Bass' Shine LA movement brought together community members in the Sepulveda Basin, Sylmar, South L.A., Boyle Heights and at LAFD Fire Station 77 for a day of action, service and emergency preparedness. Bringing together hundreds of volunteers each month, Shine LA promotes the strength, pride and resilience of every neighborhood in Los Angeles.

"Through Shine LA we are creating new opportunities for residents to engage with their communities and neighbors," said Mayor Bass. "This is more than volunteer engagement — this is about empowering Angelenos to take pride in their city and show what's possible when we all come together."

Shine LA activations took place in the Sepulveda Basin, Sylmar, a San Fernando Valley Fire Station, South LA and Mariachi Plaza. Activities and resources included habitat restoration, loose-litter pickup, distribution of free emergency preparedness resources and more.

"SoCalGas is excited to roll up our sleeves alongside Mayor Bass and Friends of the LA River at the Shine LA volunteer event," said Andy Carrasco, Vice President of Communications and Regional Stakeholder Engagement at SoCalGas. "Restoring habitats in the Sepulveda Basin is more than a dedication to environmental stewardship—it's a call to action. Together, we're transforming open spaces in Los Angeles, strengthening our communities,

PRSRT STD U.S. Postage PAID San Fran CA 941 Permit No. 820 and driving sustainability forward for future generations."

"We in Sylmar are pleased and excited to have Shine LA in Sylmar. Shine LA is a fantastic initiative from our Mayor Karen Bass. This initiative helps to foster a community day of service bringing beautification projects, civic pride, and overall unity within the community. We hosted a resource fair at the Sylmar Neighborhood Council office connecting service providers directly to our community members," said Kurt Cabrera-Miller, Sylmar NC President. "We have fantastic partners like LA City Councilwoman Monica Rodriguez and of course Sylmar Graffiti Busters who have been helping to keep Sylmar clean, safe and beautiful for over 35 years. Any time we can come together with pride and togetherness as Sylmarians and Angelenos in times of celebration it's a win-win for our community and our

Mayor Bass attended Shine LA activations, helping to distribute hundreds of resilient safes to east San Fernando families with the LAFD, Boys and Girls Club of San Fernando Valley, Sentry Safe and Master Lock. She also joined Assemblymember Mark Gonzalez, Weingart East LA YMCA and Little Tokyo Service Center to serve hot meals and dis-

tribute more than 1,000 turkeys to Angelenos. Despite fear caused by reckless immigration raids in communities like Boyle Heights, the event represented the purpose of Shine LA to bring neighbors together to one another, creating stronger communities that represent the resiliency of Los Angeles.

Holding Shine LA in the Sepulveda Basin, builds upon Mayor Bass' continued efforts to address longstanding public safety concerns in the Basin while also preparing the area to host games for the 2028 Olympics and Paralympics. Under the Mayor's direction, efforts have been made to conduct homeless outreach, the clearing of encampments and managing trees, brush and other vegetation to reduce fire risks. The Mayor's Office has also secured funding to make investments in the cleanliness and safety of the Sepulveda Basin.

Shine LA is held every fourth Saturday of the month, with activations occurring all over Los Angeles. Angelenos can go to mayor.lacity.gov/ShineLA to be notified of the next Shine LA or to partner with the Mayor's Office to sponsor Shine LA in their neighborhoods.

COMMERCIAL CONSTRUCTION OPPORTUNITIES

Why Distressed and Defunct Shopping Malls Are Good for Construction Contractors

[Article originally appeared in https://constructionexec.com]

By Adam Toosley

Unconventional buyers of former shopping malls are reshaping commercial real estate development.

For decades, the shopping mall was a symbol of prosperity and a social place for people to congregate. However, shopping malls, especially larger indoor malls, have been facing a steady decline for decades. While components of the commercial real estate market continue to evolve, large shopping malls—especially those built in the second half of the 20th century—are struggling to remain relevant in a rapidly changing retail landscape. Many articles have been written about the downfall of the shopping malls with eye-popping statistics, including, according to one author, that the number of shopping malls has fallen from 2,500 in the 1980s to roughly 700. Although there have been some positive financial indicators for remaining mall owners over the past two years or so, there is no guarantee that the downward trend will not continue in both the short- and long-term future. From a legal standpoint, distressed mall transactions present unique challenges in due diligence, title clearance and zoning compliance.

Several key factors have contributed to the downturn of shopping malls:

The Rise of E-Commerce

Online shopping has fundamentally altered consumer behavior. With the convenience of browsing, comparing and purchasing products from home, many shoppers have shifted away from brick-and-mortar stores. Giants like Amazon, along with direct-to-consumer brands, have captured significant market share, reducing foot traffic in traditional malls.

The COVID-19 Pandemic

The pandemic accelerated existing trends. Lock-downs and health concerns forced many retailers to close temporarily or permanently. In many instances, malls that were already struggling found it difficult to recover.

Changing Consumer Preferences

Today's consumers, especially younger generations, prioritize experiences over material goods.

San Francisco Centre (Formerly Westfield)

This shift has led to a rise in spending on dining, travel and entertainment rather than traditional retail. Malls that fail to adapt to these preferences are losing relevance.

Over-Retailing and Market Saturation

Shopping and strip malls have been built all over the U.S. for decades. Even though the construction of large, indoor malls has all but stopped, this oversupply has made it difficult for many malls to maintain occupancy and profitability.

Loss of Anchor and Staple Tenants

Over the past 20 years, malls have had to endure significant bankruptcies and restructurings, including anchor tenant chains such as Macy's, Sears, J.C. Penney, K-Mart and Toys-R-Us as well as staple stores like Forever 21, Claires and Pier 1 Imports. The loss of income from these stores, coupled with the ripple effect of having less foot traffic because these stores were no lon-

ger there, has caused a significant issue for mall owners and operators.

As a result of these issues, many malls are facing one of four typical outcomes, all of which have possible impacts for construction companies:

1. Foreclosure or Investor Acquisition

Financially distressed malls often fall into foreclosure, or their owners must find investors or new owners to avoid the possibility of foreclosure. In some cases, investors purchase these properties at a discount, hoping to repurpose or revitalize them. However, success is far from guaranteed; many properties remain underutilized, and some investors neglect even basic maintenance after acquiring them at bargain prices. To avoid negative repercussions that may come from one of these investors buying the property, some retailers have had to pivot to an entirely different strategy: buying the physical building from their landlord. An example

of this is what happened to the Longview Mall in Texas. There, department store chain Dillard's and a partner purchased the mall for \$34 million in what it said was a preventative measure to stop the property from deteriorating under new ownership.

2. Adaptive Reuse

Some developers are reimagining malls as mixed-use or residential developments. Former retail spaces are being converted into entertainment spaces (such as trampoline parks or pickle ball facilities, e.g.), office spaces, medical centers, schools or even churches. Some examples of this include Golf Mill Mall in Niles, Illinois, the Westside Pavilion in Los Angeles and the Lakeside Mall in Sterling Heights, Michigan. This approach can breathe new life into a property while meeting local needs. This provides a unique opportunity for construction companies that can perform work in the space.

3. Boutique and Local Retail Influx

As national chains exit (either voluntarily or involuntarily), smaller local businesses and boutique shops sometimes move in, attracted by lower rents and the opportunity to reach a broader audience. While this can create a more unique and community-focused shopping experience, it often isn't enough to fully revitalize a large mall and may actually lead to less foot traffic within the mall itself. These tenants may also be a larger financial risk for a mall owner or operator.

4. Demolition

In cases where redevelopment is not viable, demolition may be the only option. The land may be repurposed for housing, medical centers or converted to green space. In many instances, this is the end result when a mall sits unoccupied for long periods of time creating a nuisance and possibly a safety issue. This can not only represent a new beginning for the community, but significant opportunities for contractors and developers.

Although the demise of the traditional indoor shopping mall may have an initial negative financial impact, opportunities within the construction industry can flourish. More specifically:

 Demolition Contractors — Around 2,000,000 square feet of retail space was demolished in 2022 alone.

Gen Z Revitalizes the Skilled Trades Amid Construction Labor Shortages

Continued from page 1

has created a surprising and welcome turning point for the skilled trades. In 2024, The Wall Street Journal labeled Gen Z the "Toolbelt Generation," noting a 23% increase in enrollment in trade programs and a 16% rise in enrollment at vocational-focused community colleges. Increasingly, young people are drawn to work that offers immediate earnings without having to assume the insurmountable debt resulting from

The "college for all" movement is waning, not just for young people, but their parents as well: a recent Wakefield Research survey found that nearly nine in ten parents believe young people should consider pursuing a career in the skilled trades. The federal government has also renewed its commitment to bolstering the skilled labor population through the Strengthening Career and Technical Education for the 21st Century Act. or Perkins V, signed into law in 2018. The legislation expanded career and technical education to meet the needs of today's labor market. As a result, states and local communities revitalized CTE, positioning it as a viable and worthwhile pathway for students.

For Gen Z, the default sequence of high school, college and office career no longer guarantees success, let alone security. When many apprenticeships and certification programs allow young adults to earn while they learn, with potential for advancement in a stable industry, a career in the trades becomes a much more appealing choice.

CALIFORNIA SUB-BID REQUEST ADS

Buhler Commercial CSLB # 1003262 400 Brannan St., Ste. #204 • San Francisco, CA 94107 (415) 610-8650 An Equal Opportunity Employer

Buhler Commercial is preparing a bid as a Prime contractor for the following project:

San Francisco Unified School District

Commodore Stockton, Jefferson, Argonne Pre-K, Noreiga, Tul Elk, John McClaren, San Miguel, Theresa Mahler, & Zaida Rodriguez
PA Systems Upgrade Package 6

Women's Business Enterprises, Other Business Enterprises, Minority Business Enterprises, Small Business Enterprises, Local Business Enterprises, Disabled Veteran Business Enterprises Participation Goal

Bid Date: December 18th, 2025 2PM

Buhler Commercial is soliciting proposals/quotes from all qualified and certified Women's Business Enterprises (WBEs), Other Business Enterprises (OBEs), Minority Business Enterprises (MBEs), Small Business Enterprises (SBEs), Local Business Enterprises (LBEs), and Disabled Veteran Business Enterprises (DVBEs), for the scopes of work required for the subject project located at nine different elementary schools (Commodore Stockton, Jefferson, Argonne Pre-K, Noreiga, Tul Elk, John McClaren, San Miguel, Theresa Mahler, Zaida Rodriguez Schools) in San Francisco, including but not limited to:

- · Abatement and demolition of existing PA system devices and other equipment along with lead paint removal
- · New electrical outlets and breakers (in existing panels) for new PA system work
- · New electrical conduit for new PA scope
- · Telecom scope includes new PA devices, IDF, MDF, and infrastructure for new system upgrades.
- · Fireproofing at fire rated penetrations for new PA system scope
- · Painting of exposed conduit and patching at wall penetrations
- · Project is subject to a Project Labor Agreement (PLA) that all subcontractors must agree to in order to work on this project
- · Any Mechanical, Electrical and Plumbing Subcontractors (including C-4, C-7, C-10, C-16, C-20, C-34, C-36, C-38, C-42, C-43, and C-46) must be prequalified with the district in order to bid this project (you can submit your prequalification to the district within 10 days of the bid opening)

Construction Schedule: Overall Duration: 199 Calendar Days, Anticipated Start Date: January 2026

Matthew Anderson (415) 610-8650; matthew.anderson@buhlercommercial.com is the estimator for this project and is available to aid or answer questions regarding the project scope of work, bid requirements, bonding and insurance requirements, or any other questions you may have. Buhler Commercial will provide any assistance it can in helping interested parties in obtaining bonds, lines of credit, and insurance required. All proposals/quotes should be emailed to the Estimator prior to 12:00 PM on the Bid Date. Buhler Commercial is willing to break out any portion of work to encourage MBE/OBE/SBE/WBE/LBE/DVBE participation. All subcontractors are required to execute Buhler standard subcontract agreement and comply with all insurance requirements. Buhler Commercial requires subcontractors awarded on this project to provide Payment and Performance Bonds from a surety at the subcontractor's expense for any contract that exceeds \$300,000. Buhler Commercial is signatory to the Carpenters and Labors Union. This is a Prevailing wage project. This project is subject to a project labor agreement (PLA) that all contractors on the job must agree to in order to perform work. All subcontractors must be registered with the DIR. When submitting a bid proposal be sure to acknowledge the projects bid documents (Drawing, Specifications, Addenda, ETC). Project documents such as plans, specifications and addendums can be found at https://login.onlineplanservice.com/detail.aspx?idwebDB=True&BidPackageID=1319987&HOMEPR=COPS&STATUS=BIDDING&DOCLOC=COPS25-03761&PUNIQ=25-03761&welcome=1

Project documents can also be obtained by contacting Matthew Anderson at information provided above. Buhler Commercial will also send invites through Building Connected to interested subcontractors which will have all project documents listed on the Building Connected listing

Why Distressed and Defunct Shopping Malls Are Good for Construction Contractors

Continued from page 2

- Retail Construction Companies—If a decision is made to transform a mall, especially if it is being done to create a reuse that keeps the general building envelope, significant construction work will more than likely need to be done, including everything from updating or moving electrical, plumbing and/or HVAC to completely rebuilding the space(s) to accommodate the new tenant or owner.
- Architects and Design Professionals— The decline of the shopping mall has opened up a significant opportunity for architects and other design professionals to consider unique plans to either adapt
- malls into other uses or create alternative structures in a large open space that may not otherwise exist in an urban or suburban location
- Residential Contractors—In a large portion of the instances where a mall's use is being adapted or the mall itself is being demolished, the end result involves some component of residential living. Not only will this have positive impacts for general contractors, but all subcontractors that would typically perform in that space.

What Comes Next

As distressed malls continue to change hands, unconventional buyers such as department store chains and private equity groups are reshaping the commercial real estate landscape. These acquisitions are not merely financial transactions—they involve complex legal considerations that can significantly impact redevelopment timelines and costs.

Looking ahead, distressed mall transactions will likely increase as traditional retail continues to contract. Legal professionals play a pivotal role in structuring deals that mitigate risk while unlocking redevelopment potential. For stakeholders, the ability to anticipate regulatory challenges and market shifts will determine success in this evolving sector.
