## 9 Steps To Keep New Asphalt Crew Members From Quitting

[Article originally appeared in www.forconstructionpros.com]

#### By Brad Humphrey

Almost every pavement maintenance contractor will be adding to their employee count by hiring new workers this year. It is incredibly important that those contractors set the pace and expectations they desire for the new worker.

How a new worker is assimilated into the crew, that is, made to feel like one of the crew members is key to their staying with the contractor. So it is in this spirit that I want to share nine key steps to start that "on-boarding" effort that keeps new workers longer.

### Step 1. Call the New Worker BEFORE They Start

It's amazing what this brief call can do to inspire new workers to show their first day. This call should welcome the worker to the company, remind them of when to arrive, what clothing they are to work in, and confirm they have a way to get to work. Keep it upbeat and friendly and provide them with the chance to ask questions. Ideally, the Owner, or the new worker's immediate leader should make this call.

### **Step 2. Meet & Greet New Worker on Their 1st Morning**

Have someone looking out for this new worker's arrival and have them take the new worker around to meet the other crew members. Make sure to use the new worker's name as you introduce them. The foreman should take just a few minutes to assess that the new worker has the

needed safety wear and then explain what his expectations are for the new worker and that's it's OK "not to know everything."

### Step 3. Explain the Morning Routine

This primarily involves demonstrating what it takes to get ready to leave the yard each morning and what his early role will be as he begins his work. It's important that new workers are given work that they can begin to execute daily as this will make them feel like part of the team.

### **Step 4. Talk to the New Worker on the Drive to the Job Site**

A continuation of getting to know the worker should be exercised on the drive to the job site. Asking the new worker how they may have completed work at their last employer and giving the worker an idea about what will be done on today's job site. It's important to have some conversation while on the ride as it provides you, and other workers, the chance to better understand this new worker's work ethic, experience, drive, likes, dislikes, etc.

## **Step 5. Explain the Purpose of Stretching and the AM Huddle**

Not every contractor takes five minutes for workers to stretch so your new worker may never have performed morning stretches before. If your crew normally does not take the time for stretching, this will be a good excuse to start. It's healthy, gets the blood pumping, and is a proven positive on reducing minor strains and sprains.

### Step 6. Conduct Your AM Crew Huddle

This is a "stand-up" meeting, maybe while you are also stretching, that lines out the day's work, directing workers to who will be doing what and where. It's also a good time to allow all the workers to ask questions about the day's efforts, when is material to arrive, and what amount of work needs to be completed for the day. Any issue related to the project needs to be shared as a reminder, i.e. reminder to keeping the site clean, expectations of the client, limiting the rough talk as site is next to elementary school, proper use of needed barricades, safety tape, etc.

## Step 7. Practice a "4 – Quarter" Overview Throughout the Workday

Good idea anyway, but especially if you have a new worker. Take a stroll around the work site at least every sixty to ninety minutes. This works out to be about four times a day to see how work is progressing and what needs the new worker has that can be quickly addressed. If training is needed, use the following process: 1. Explain; 2. Demonstrate; 3. Observe; 4. Offer Feedback.

#### Step 8. Afternoon PM Crew Huddle

This should always be completed just prior to leaving the jobsite for the day, after all equipment and tools are squared away.

## Why Manual Project Searches Are Costing Your Construction Business

[ Article originally appeared in www.constructconnect.com ]

### By Maila Kim In short:

### • Manual project searches cost more in time and money than most contractors realize.

- Private commercial projects now make up more than half of U.S. commercial construction work.
- Digital tools like ConstructConnect® Project Intelligence help you access more opportunities, including public and private nonresidential projects.
- Switching from manual to digital searches can save contractors up to \$31,000 per year.

Manually searching through public project listings might seem like a way to save money. But in reality, it's costing you both in time and missed opportunities. In 2025, with private commercial projects on the rise, relying on manual searches could hurt your business.

### The Hidden Cost of Manual Project Search

Just because the data is public doesn't mean it's free. Hunting through listings takes time, and in construction, time is money.

### **How Much Time Are You Really Spending?**

On average, a mid-sized contractor typically spends 9-14 hours per week on manual searches. Based on national pay averages, a contractor's fully burdened wage is approximately \$60/hour. Over a year, this manual search process costs \$31,000 per employee, per year. This adds up to over \$93,000 annually for teams of three contractors which is more than the annual fee for top-tier project intelligence software.

And it's not just about dollars. Every hour you spend digging for leads is an hour you're not bidding on new work, following up with clients, or managing active projects. You might think you're saving money by sticking to manual methods, but it's actually costing you big time.

Use this calculator to check how much project search is costing your business.

### The Rise of Private Projects

Public projects may seem abundant, but they now represent a shrinking share of the total market.

According to the U.S. Census Bureau, private, invitation-only projects have grown over the past five years and now represent 60% of all commercial construction projects in the U.S.

This is consistent with ConstructConnect's Putin-Place Construction Forecast Report. Michael Guckes, Chief Economist, reports, "Private sector activity is anticipated to handily outperform its public sector equivalent based on forecasted 5-year compounded annual growth rates (CAGR) through 2029. The 5-year CAGR for total private construction at 4.6% is more than double that of its public sector equivalent at 2.0%."

Contractors who still rely solely on public data are missing out on more than half of today's potential opportunities, especially in infrastructure projects, which make up a growing share of today's market.

### Digital Tools: Find Better Projects, Faster

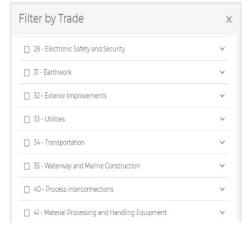

Switching to digital tools like ConstructConnect® Project Intelligence (CCPI) isn't just about saving time. It's about staying competitive in today's market.

### 1. Access a Broader Market

With platforms like CCPI, you get access to the public and private markets. This means you're not missing out on opportunities simply because they weren't listed publicly.

**Before:** Searching across SAM.gov, state e-procurement, and other portals to piece together public information.

After: One dashboard with everything you need, from IIJA-funded federal work to private development. In ConstructConnect® Project Intelligence, you can filter by trade, project category, sector, and more (see below).

## **CALIFORNIA SUB-BID REQUEST ADS**

electric Econstruction company

Owner: The Port of Hueneme, Oxnard Harbor District
Project Name: North Terminal Shore Power! Contract No. CMCRPL-6197(010)
Location: 333 Ponoma Street P.O. Box 608 Port Hueneme, CA 93044
Revised Bid Date: September 18, 2025, at 2:00p.m.

MEC will be requesting quotes for various areas of work listed in, but not limited to, the scopes of work below: demolition| grading| electrical duct banks| conduit| wire & cable| excavation| prefabricated metal building| installation of electrical devices| precast underground manholes & pull boxes| fire alarm| lighting| wire & cable| scaffolding| electrical testing | electrical procurement

Project Description:
The North Terminal Shore Power Project will provide state of the art electrical infrastructure and electrical-grid-base connection allowing Roll-on/Roll-off Ocean going vessels to shut down diesel auxiliary engines while at berth, connect into shore power, and effectively eliminate vessel diesel emissions while at berth. The scope of this project includes: demolition and removal work; installation of electrical equipment, underground and under wharf conduits, brackets, conductors, terminations, shore power connection interface equipment, electrical switchgear, neutral grounding resistors, NGR selector switch, transformers, panels, lighting, fencing, stripping, grading, guard posts, and all other work as shown on the project plans and specifications; trench, de-water, shoring, backfill, and resurface excavated areas to match existing pavement; Fill, compact, and grade voids and excavations caused by the demolition and removal work; grading of the work area; installation of prefabricated building, Install SCE infrastructure; apply dust control agent over graded area; Site cleaning and removal of debris, equipment, and excess material from the sites upon completion of work; Install shore power system; Other work.

rms interested in receiving a bid package for this project must contact us at the e-mail address noted. Responding firms will be issued an "Invitation Bid" through MEC's electronic use of Building Connected (at no cost to bidder) with project information and bid instructions. Plans and specification II also be available for review at the address listed below if requested.

## **CALIFORNIA SUB-BID REQUEST ADS**

McCarthy is soliciting bids from qualified CBE (MBEs WBEs DBEs DVBEs) subcontractors and suppliers

Olive View - UCLA Medical Center Continuum of Care Facility

BID DATE: September 14, 2025

McCarthy is soliciting interest from qualified subcontractors and suppliers to participate in the proposal phase of the project.

Project description: The project will be constructed at Olive View-UCLA Medical Center campus located on the west side campus and on the corner of Hillside Drive and Bucher Avenue. It is the former site of various cottages which were demolished, and the parcel is now vacant. This project includes construction of the 3-story, 61,000 square foot Mental Health Facility with secure outdoor activity site and surface parking lot in adjacent space. The Mental Health Facility will be comprised of 3 programs with 16-beds each, for a total of 48 beds in a single 3-story building.

Our proposal will consider the development's placement among the larger campus and its ability to create a perimeter identity that recognizes the medical center and its relationship to the surrounding buildings. Make ready work for grading and fill should be taken into consideration as part of the scope of work. Additionally, the project will develop the site to provide limited on-site parking, utilities, and landscape/hardscape improvements between the project site and nearby Department of Agriculture buildings and parking lot.

Project Location: 14445 Olive View Drive, Sylmar, CA 91342

Work categories include: Site Concrete, Landscaping. Glazing, Paint, Flooring, Asphalt Concrete, Striping, Roofing, Structural Steel, Misc metals, Casework, Doors/Frames/Hardware

Key Subcontractor Qualifications: CA DBE Experience with Behavioral Health projects

Key Dates: Request for Proposals (RFP) to be issued to Subcontractors - 09/04/25 via Building Connected website; Proposals Due to McCarthy Building Companies - 09/14/2025.

This project requires:

- Prevailing Wages
   Community Workforce Agreeme
   Project Labor Agreement (PLA)

McCarthy is an equal opportunity employer and encourages qualified Small Business and Minority Business participation. All qualified applicants will receive consideration for employment without regard to race, religion, sex, or national origin.

Please contact us if you have any questions regarding project specifics

McCarthy Title: Preconstruction Director E-Mail: tfoos@mccarthy.com
