

Leave groundwater management to local water experts

[Article originally appeared in
www.calmatters.org]

By Louise Lampara, CalMatters,

Assemblymember Steve Bennett's proposed Assembly Bill 2201, which would create a new permanent permitting process for groundwater wells, negatively affects local water districts, municipalities and California's agricultural community.

Despite recent amendments to the bill language, AB 2201 would force a strict new mandate on how groundwater sustainability agencies must operate. The bill removes the ability of locally based groundwater experts to decide for themselves what management options best address local conditions. Instead, the bill would require local experts to make specific findings and determinations for new and modified groundwater wells before they may be allowed.

Sacramento legislators need to entrust groundwater management to the local experts.

The Sustainable Groundwater Management Act, passed in 2014, recognized that it is critical for water issues to be managed and resolved at the local level. When he signed the act into law, then-Gov. Jerry Brown stated that, "groundwater management in California is best accomplished locally." The act achieves this by requiring individual local basin groundwater sustainability plans to identify the challenges and solutions unique to each local groundwater basin.

As a Ventura County supervisor, Assemblymember Bennett supported robust local

Creating a Successful Team Culture During a Project

[Article originally appeared in
www.constructionexec.com]

By Matt Schnelle

The work environment we experience today in the construction industry has changed significantly over the past ten years and will undoubtedly continue to evolve. In many ways, the pandemic sparked a significant change in how people view their work-life balance and are seeking opportunities that allow them to take advantage of this shift.

Demand for talent is at an all-time high, and many job seekers can be more selective about their employers, especially around things like culture fit. This culture fit translates to project teams, too; teamwork and collaboration between the owner, designers, construction management team and subcontractors is a key factor to the success of a project.

The construction industry's backbone relies on bringing many diversified skills and nuanced personalities together under one roof. This creates a potential for miscommunication and a lack of cohesion between the various members of the construction team: A group that could be together for 12 or more months at a time. In its most basic form, success can be measured in many ways, but the common areas are safety, quality, schedule and budgets. In the same regard, cohesion and relationships between internal and external team members is another benchmark to consider and can often be the biggest driver of the outcomes for the more traditional measures of success.

To create a thriving team culture, a few key factors can make a significant difference.

The Foundation

In addition to the importance of ensuring that all work is executed safely, a clean and organized site sets the tone and culture of the project and shows your commitment and belief in the project as a leader. Sending that message to your internal team and all subcontractors throughout a project is essential in building and maintaining trust and respect amongst all parties.

As a leader or co-leader of a large group, it is essential to establish and communicate collective goals from the start. Ensuring that each group knows what benchmarks they are responsible for meeting and when helps keep both internal and external teams on track. It is also important to have metrics in place so you know where you are succeeding and/or where you need to improve, as well as a way to share these results with everyone involved. Doing so allows you to acknowledge and reward success and openly

recognize challenges and potential setbacks as a group as well as hold everyone accountable for their commitments.

Conflict will happen and it is one of the most universal issues that a leader is responsible for resolving. Creating an open line of communication between team members and the project leaders will help create a clear path to resolution. From the onset of a project, it is helpful to clearly distinguish who the decision makers are so that it is clear to everyone who has the authority to make decisions on the job site. Once problems arise, they can be resolved quickly and efficiently without taking time away from other tasks.

Request for Qualification (RFQ)
RFQ Period: August 25, 2022 – September 9, 2022

Turner Construction Company (Turner) is seeking qualified Subcontractors for the following project:

Gateway – University of California, Berkeley
UCB Project No. 12785A

Turner has been awarded the UCB Gateway project designed by Weiss Manfredi, Executive Architect Gensler and MEP by Interface, located at the former Tolman Hall site, bounded by Hearst Avenue to the north, Koshland Hall to the west, and Morgan Hall and Wellman Courtyard to the east. The project gateway will span over Morgan Bikeway with new paving and planting to invite visitors into campus. This is a new 5-story, 374,590 square feet building hosting Berkeley's data science classrooms, seminar and core spaces on the lower level, while the upper five levels are dedicated to a mix of research labs, faculty and staff offices, workstations and collaborative meeting spaces. This project is seeking either LEED Gold or Platinum certification.

Trade Subcontractors who do not submit the pre-qualification information and are not pre-qualified will not be allowed to propose on the project.

Turner is currently seeking RFQs for the following Trade Packages:

Group	Bid Package #	Trade Package
4	BP 16	PERSONNEL HOIST
5	BP 8	LOW VOLTAGE
5	BP 10	EXTERIOR BUILDING MAINTENANCE
5	BP 17/18	STAIRS
5	BP 19	TERRAZZO
5	BP 20	FIRE SHUTTERS
5	BP 21	COILING DOORS
5	BP 22	FOOD SERVICE
5	BP 23	FIREPROOFING
5	BP 24	LECTURE HALL SEATING
5	BP 25	FLOORING (INCL SEALED CONCRETE, WD FLOORING)
5	BP 42	ROUGH CARPENTRY
5	BP 43	TILE
5	BP 44	PAINTING
5	BP 35	DRYWALL, INSULATION & ACOUSTICAL PLASTER
5	BP 54	DEMOUNTABLE PARTITIONS

Turner has a 20% UBE [MBE/WBE/DVBE/LGBTQ+] goal for this project.

University Project Reference: <https://capitalstrategies.berkeley.edu/gateway>

For information on how to Pre-Qualify with Turner, please contact Mayra Morales – Subject: UCB Gateway at the following email address: projectoutreach@tcco.com

Leave groundwater management

Continued from page 1

groundwater management. He was instrumental in the adoption of Ventura County Well Ordinance No. 4468, which established policies to ensure that wells are “executed, operated and destroyed in such a manner that the groundwater will not be contaminated or polluted, and that water obtained from the water wells will be suitable for use and will not jeopardize the health, safety or welfare of the community in Ventura County.”

But through AB 2201, Bennett has disregarded the importance of local management and expertise in favor of a “one size fits all” statewide authority, adding yet another layer of bureaucratic red tape to an already arduous process.

Only three months ago, Gov. Gavin Newsom enacted Executive Order N-7-22 to protect health, safety and the environment during this drought emergency. The order directs local agencies to work collaboratively with local groundwater agencies when considering new and altered well requests. Under this order, public agencies cannot approve a permit for a new groundwater well (or for altering an existing well) in medium- or high-priority basins subject to the Sustainable Groundwater Management Act without first obtaining written verification from the local groundwater agency that the proposed well

would not negatively impact the sustainability goal for that specific basin.

AB 2201 would codify — and complicate — the directives of the governor’s executive order.

Right now, an advisory committee of more than 80 representatives from a broad range of sectors and geographic areas within the state, each with expertise in well permitting, design, construction, maintenance and destruction, are revising the state’s well standards to ensure the protection of California’s groundwater quality. At the same time, municipalities, water users and groundwater managers are actively working through the challenges of implementing the executive order’s directives.

We must allow our local community experts the time and opportunity to work through the order and the upcoming changes to the state’s well standards to determine how these requirements will be implemented in their own basins before the Legislature complicates the process by permanently reducing the local control guaranteed in the original act.
