

Increase in Number of Fatal and Nonfatal Injuries For Construction Workers in 2018

Photo by Skitterphoto from Pexels

[Article was originally posted on www.constructconnect.com]

By Kendall Jones

It's no secret that construction is dangerous work. That's why safety should always be the top priority on every jobsite. According to the U.S. Bureau of Labor Statistics' Survey of Occupational Injuries and Illnesses Data and the Census of Fatal Occupational Injuries, workers in the construction industry suffered nearly 200,000 nonfatal injuries and over 1,000 fatal injuries in 2018.

The construction industry again had the highest number of fatalities of all industries with 1,008 worker deaths. This is a 2.0% increase over the 971 fatal injuries in 2017. The construction industry represented 19% of all private industry worker deaths in 2018.

The fatal injury rate for the construction industry in 2018 was 9.5, which is no change from the previous year. For all workers, the fatal injury rate remained at 3.5 in 2018. The fatal injury rate is calculated as the number of fatal occupational injuries per 100,000 full-time equivalent (FTE) workers.

Despite accounting for the highest number of worker deaths, the construction industry only had the fourth highest fatal injury rate among all industries. Agriculture, forestry, fishing, and hunting had a fatal injury rate of 23.4 per 100,000 FTE followed by mining, quarrying, and oil and gas extraction at 14.1, and transportation and warehousing at 14.0.

The number of nonfatal injuries and illnesses in the construction industry increased from 198,100 in 2017 to 199,100 in 2018. The incidence rate for nonfatal injuries and illnesses dropped from 3.1 in 2017 to 3.0 in 2018.

Construction Worker Deaths

In the construction industry, the four leading causes of worker deaths not involving highway collisions were falls, being struck by objects, electrocutions, and getting caught-in/between objects. OSHA has dubbed these the Fatal Four as they were responsible for 58.6% of all construction worker deaths in 2018.

Fatal Four Construction Worker Deaths

Falls - 338 out of 1,008 total construction worker deaths in 2017 (33.5%)

Struck by Object - 112 (11.1%)

Electrocutions - 86 (8.5%)

Caught-in/between - 55 (5.5%)

Transportation Incidents

The other major leading cause of construction worker deaths was transportation incidents which accounted for 250 deaths in 2018, up from the 234 fatalities in 2017.

Most of these deaths (152) were from roadway incidents involving motor vehicles: 88 were from collisions with other vehicles, 35 were from collisions with an object other than another vehicle, and 29 were caused by a noncollision incident such as a jack-knifed or overturned vehicle. Of the 56 pedestrian vehicular fatal injuries to construction workers, 36 occurred in work zones.

Other Events or Exposures

Violence and other injuries by persons or animals resulted in 61 construction worker deaths in 2018. There were 30 deaths caused by intentional injuries by another person and 28 deaths caused by suicides on the jobsite.

There were 16 construction worker deaths caused by fires or explosions. Of those, 12 were attributed to explosions and 4 were attributed to fires.

Occupations With Highest Number of Fatalities

The top 10 occupations that resulted in fatal injuries in the construction industry were:

1. Construction Laborers – 259 deaths
2. Supervisors of Construction and Extraction Workers – 144 deaths
3. Roofers – 96 deaths
4. Carpenters – 86 deaths
5. Electricians – 80 deaths
6. Construction Equipment Operators – 51 deaths
7. Pipelayers, plumbers, pipefitters, and steamfitters – 37 deaths
8. Painters and paperhangers – 31 deaths
9. Structural Iron and Steel Workers – 15 deaths
10. Highway Maintenance Workers – 14 deaths

Nonfatal Injuries and Illnesses

Of the 199,100 recorded injuries and illnesses suffered by workers in the construction industry in 2018, over 39% of them involved workers missing days away from work.

Those 77,490 injuries and illnesses that required days away from work resulted in 21,230 sprains, strains and tears; 14,300 incidences of soreness or pain; 10,180 cuts, lacerations, and punctures; and 9,920 fractures.

The median time away from work after suffering an injury or illness on the job in construction was 10 days in 2018, the same as in 2017. Of the

SMALL
BUSINESS
EXCHANGE

Take Your Business Global in 2020

[Article was originally posted on www.sba.gov]

By David M. Glaccum

When brainstorming how to grow your business in 2020, think big. Expand your plans beyond just your local community and consider selling goods or services internationally.

According to a study by the Institute for International Economics, U.S. companies that export not only grow faster, but are also 8.5 percent less likely to go out of business than non-exporting companies. What's more, growth opportunities abound for exporters, since nearly 96 percent of consumers live outside the U.S., and two-thirds of the world's purchasing power is in foreign countries. Ultimately, exporting can help small businesses – who make up 98 percent of all exporters – to increase profits, reduce market dependence and stabilize seasonal sales.

The 2019 U.S. Small Business Administration (SBA) Exporter of the Year, EarthQuaker Devices, was able to expand from a home office to a renovated two-story, 15,000-square-foot building using their increased earnings from exporting. You too can leverage international trade opportunities to advance your business's goals and flourish as an exporter.

How to Trade Up and Become an Exporter

Are you ready to take the plunge and expand your business abroad? Consider taking the following steps:

- **Learn about the market.** Use export statistics from the U.S. Census Bureau to pinpoint large international markets where growth has been consistently strong over the past several years. Don't forget to also research up-and-coming markets (where there may be fewer competitors). And U.S. Export Assistance Centers (USEACs) can help you with this process if you're unsure where to start or don't know if your products are a good fit for these markets.
- **Connect with buyers or distributors.** Another key step in forming your exporting strategy is deciding whether direct or indirect selling makes most the sense for your business. Indirect selling means selling your products through an intermediary. Hiring export management companies and export trading companies can often be the easiest way for small businesses to break into a new market, since these companies already have international contacts. Direct selling, on the other hand, means that you are responsible for finding international buyers for your

products, whether through advertisements, trade shows or an e-commerce presence.

- **Secure financing.** U.S. banks often consider lending to exporters risky, but alternate funding sources exist. For instance, the SBA has programs that provide lenders with up to a 90 percent guaranty on export loans. Here is a list of participating lenders. Another option is Export Express lenders, which can directly underwrite a loan without getting prior approval from the SBA, speeding up access to capital. Check out this full list of financing options for exporters.

Resources for Prospective Exporters

If your state participates in the federal State Trade Expansion Program (STEP), then you can reach out to your local STEP office for help entering the international marketplace. Additionally, the SBA's Office of International Trade offers a toll-free trade hotline at 1-855-722-4877. You can also receive assistance at U.S. Export Assistance Centers or Small Business Development Centers. Start exploring the many benefits of exporting with the SBA today.

Increase in Number of Fatal and Nonfatal Injuries For Construction Workers in 2018

Continued from page 1

77,490 accident injuries involving days of work missed, 10,500 involved only one day away from work.

On the other end of the spectrum, 24,260 accident injuries involved 31 days or more away from work, which comes out to 31% of all accident injuries requiring days away from work. In addition to probably meaning those were severe injuries inflicted on workers, that's a lot of lost productivity and man-hours for employers to have to deal with.

Sources and Events Leading to Nonfatal Injuries

The leading sources of injuries to workers in the construction industry that required days away from work include: parts and materials, 16,960; the injured worker, 9,490 (with 9,330 cases caused by the worker's position or movement); hand tools, 8,240; floors, walkways, and ground surfaces, 7,150; vehicles, 5,300; and machinery, 5,260.

For the construction industry, contact with an object or equipment was the leading event for non-fatal injuries that involved days away from work at 26,490. Next up was fall, slips, and trips which

accounted for 22,020 injuries with 11,960 being falls to a lower level. Overexertion and bodily reaction caused 20,240 injuries and 3,630 were from transportation incidents.

Violence and other injuries by persons or animal were responsible for 780 injuries. Of those, 660 were from animal or insect related incidents and 100 were from intentional injury by another person.

Fires and explosions caused 230 injuries and exposure to harmful substances or environments were responsible for another 2,970 injuries.

Occupations With Highest Number of Nonfatal Injuries

The top 10 occupations that resulted in injuries or illnesses with days away from work in the construction industry were:

1. Construction Laborers – 20,430
2. Carpenters – 12,640
3. Electricians – 6,350
4. Pipelayers, Plumbers, Pipefitters, and Steamfitters – 5,780
5. Supervisors of Construction and Extraction Workers – 5,390

6. Construction Trade Helpers – 3,460
7. Carpet, Floor, and Tile Installers and Finishers – 2,380
8. Painters and Paperhangers – 2,130
9. Roofers – 2,060
10. Drywall Installers, Ceiling Tile Installers, and Tapers – 1,300

The number of injuries and fatalities that occur in the construction industry each year is unacceptable. Companies, supervisors, and safety managers need to make training a top priority and ensuring that workers know how to perform their jobs safely and are equipped with the proper safety and personal protective equipment. Remember, the rules and standards set out by OSHA are the bare minimum that employers are required to follow to ensure each and every worker makes it home safely at the end of each shift.

Wishing everyone a happy, safe, productive, and prosperous new year.

PUBLIC LEGAL NOTICES

Outreach January 2020

Engage with the Port of San Francisco regarding waterfront resilience. Join the Port for a 1.5 hour walking tour on January 11 around Islais Creek to learn more about the neighborhood history and ecology as well as the City's work to mitigate and adapt to sea level rise. Meet at 10:00am at Islais Creek Promenade, located at 1698 Indiana Street. Additionally, the Port, the U.S. Army Corps of Engineers, and other City partners are hosting an upcoming community meeting on January 30 from 5:30pm-7:00pm located at the Southeast Community Facility at 1800 Oakdale Avenue to encourage engagement on coordinated resilience projects in the Islais Creek/Bayview neighborhoods. Join the Port and the Exploratorium in the northern waterfront for a Royal Walk with the King Tide on January 10 from 10:00-11:00am and January 11 from 10:45-11:45, located between Piers 3 and 5. Stay engaged at sfportresilience.com!

APPLY TO BECOME A CENSUS TAKER!

Every 10 years, the U.S. Census Bureau is responsible for conducting the nationwide census. The Census Bureau is recruiting now to fill important temporary positions in San Francisco with great pay (\$30/hour) and flexible hours for Spring 2020. You do not have to be a US citizen to apply.

Be a Census Taker and make a difference in your community! **Apply online NOW at 2020census.gov/jobs. GET THE SALARY AND BENEFITS YOU DESERVE.** Learn to identify your value, how to conduct objective market research and develop persuasive strategies with AAUW Work Smart Salary Negotiation Workshops presented by the FRIENDS of the Commission on the Status of Women, in partnership with the Commission/ Department on the Status of Women. Take the **FREE and self-paced e-course at friendscosw.org/online** or register for an in-person workshop at friendscosw.org/equalpay. For more information, call 415.779.6636

Make a Difference, Become a Literacy Volunteer Half of San Francisco's 3rd and 4th graders are not reading at grade level. By volunteering to tutor through the Library's award-winning FOG Readers program, you can help students in grades 1-4 increase their confidence and gain a half a grade level within the first three months. Currently, there are over 300 children waiting for a volunteer to help change their lives. For more information, visit sfpl.org/fof. To get started, email readers@sfpl.org.

Child support matters can be complicated, stressful, and confusing. The Department of Child Support Services helps parents understand the process so they know their rights and options for making and receiving support payments. Call us today at (866) 901-3212 or visit our office at 617 Mission Street to learn how we can help you. Information is also available online at www.sfgov.org/dcss. The City and County of San Francisco encourage public outreach. Articles are translated into several languages to provide better public access. The newspaper makes every effort to translate the articles of general interest correctly. No liability is assumed by the City and County of San Francisco or the newspapers for errors and omissions.
