## Little Tokyo Mall Sues Metro over Downtown Subway Project

The owners of the Japanese Village, a Little Tokyo shopping area shown in 2007, filed a lawsuit Wednesday against the L.A. County Metropolitan Transportation Authority. (Al Seib / Los Angeles Times)

By Laura J. Nelson

The owners of a pedestrian mall in Little Tokyo sued the L.A. County Metropolitan Transportation Authority and two major construction companies on Wednesday afternoon, seeking an immediate halt to work on a \$1.5-billion subway project in the area.

The lawsuit, filed in Los Angeles County Superior Court, says Metro and its contractor plan to inject a concrete-like substance into the soil beneath the Japanese Village shopping mall without securing the necessary property rights.

Attorneys for the property are seeking to halt construction until Metro obtains the so-called easements needed to perform the work.

A Metro spokeswoman said the agency's public relations staff wasn't aware of the lawsuit and could not comment.

The Downtown Regional Connector is a 1.9-mile set of tunnels that will snake from the eastern edge of Little Tokyo to a rail hub along 7th Street in the Financial District.

The project, slated for completion in 2021, is designed to allow rail passengers to seamlessly move through downtown without changing trains. Right now, for example, riders coming from Santa Monica must get off the Expo Line and transfer to the subway, then the Gold Line, to reach East L.A. or Azusa.

Although tunneling has not yet begun, work on the project is behind schedule and about 9% over its original budget.

The tunnels will primarily run beneath streets or government land, but will also intersect the Japanese Village development.

Crews plan to inject cement into the soil there to compensate for the settling that will occur during tunneling. That technique, known as grouting, is common on major construction projects.

But Metro has not secured the rights to the land that sits directly outside the tunnels but underneath the soil, according to Japanese Village's request for a temporary restraining order.

Staff for the Regional Connector Constructors, a joint venture between Skanska USA and Traylor Bros., told Metro months ago that agency staff had failed to secure all the needed easements, said Bob Crockett, the attorney representing the Japanese Village.

"Rather than delay the project ... Metro decided to go ahead and just inject the concrete," Crockett said.

A Regional Connector Constructors engineer said in a deposition last month that crews planned to move forward with the work anyway, according to court documents. The restraining order request called the action "a risky gamble that will lead to an invasion of Japanese Village's property interests."

"It's hard for a judge to stop a major project like this," Crockett said, adding that a judge may instead tell the mall's holding company to sue for any damages once construction is over. But, he said, "we're trying to stop it before the fact."

Earlier this year, Crockett said, construction crews on the project did some grouting on the western end of the plaza, raising the paving and causing some damage.

Wednesday's complaint marks the third lawsuit that the Japanese Village has filed over the Regional Connector. The group lost a state environmental lawsuit in 2012, and an appeal on a federal environmental lawsuit is pending.
