

## More Construction Companies Are Building a Technology-Focused C-Suite

[ Article originally appeared in <https://constructionexec.com> ]

By Construction Executive

**As construction and technology become enmeshed, companies are creating roles dedicated to technology.**

As technologies like artificial intelligence, robotics and more become mainstream within the construction industry, more and more construction companies are creating tech-focused positions beyond the IT team. Laine Hiera is the new—and the first—chief design solutions officer at Barge Design Solutions and she sat down with Construction Executive to describe what this inaugural step means for not only her company but for the industry.

“Before joining Barge,” says Hiera, “I knew the firm primarily by reputation. What really drew me in was that leadership wasn’t chasing technology for technology’s sake. They were asking thoughtful questions about how to support their workforce, scale wisely and prepare for the next chapter. That alignment made the opportunity very compelling.”

**To be the first of any position, or to have a position created for you, what does that process look like?**

There was clarity up front that the firm needed to think differently about digital capability, but the exact shape of the position continues to evolve alongside business strategy. Being the first in a role like this does not mean I’m arriving with all the answers. I’m building a shared understanding and earning trust while defining what “digital” truly means for Barge. I’m learning the

business, from operations to clients to employees, and understanding how it all fits together. From there, with the support of my leadership team, we’ll align digital initiatives directly to business priorities. This role exists to ensure digital capability is not an afterthought but integrated into how we operate and grow. In my experience, having had several transformational roles, the role including the job description itself will evolve as the business grows and changes.

**What was your introduction to technology/construction?**

I had an early introduction to engineering and construction as the kid of a mechanical engineer. I watched my dad complete takeoffs at a drafting table in our living room and prepare to get his crew out early to jobsites each day. I think it taught me, at a young age, a lot about the effort that goes into designing, planning and delivering something that would eventually become real and lasting. My own professional path began in business and technology. I’ve spent much of my career helping organizations navigate large, complex transformations, leaning into technology as an enabler along the way. In many ways, stepping into this role feels natural. I understand the culture of engineering and the transformations that are happening in the industry. My role at Barge is to introduce digital capabilities in a way that allows continued growth and expansion without friction.

**How have you worked your way up to this current position from your first job?**

My career hasn’t been a straight ladder. It’s been more like building layers of perspective and ex-

## Ranking Member Markey, Leader Schumer, Senate Democrats Lead Bill to Protect America’s Small Businesses from Latest Tariff Tax Madness

[ Article originally appeared in [www.sbc.senate.gov](http://www.sbc.senate.gov) ]

Ranking Member Edward J. Markey (D-Mass.), alongside Democratic Leader Chuck Schumer (D-N.Y.) and Senate Democrats, today introduced the Small Business Liberation 2.0 Act to protect small business owners, workers, and consumers from further tariff-related economic harm. Following the Supreme Court’s decision last month to strike down President Trump’s illegal International Emergency Economic Powers Act (IEEPA) tariffs, Trump announced a sweeping 15% tariff on all imports entering the United States citing Section 122 of the U.S. Trade Act of 1974. The use of Section 122 of the U.S. Trade Act of 1974 is already being challenged in the courts as its original purpose was to allow tariffs when necessary to address “large and serious United States balance-of-payments deficits.”

The Small Business Liberation 2.0 Act would exempt small businesses from paying Section

122 tariffs, refund small businesses for any Section 122 tariffs paid, and prevent price gouging for consumers because of Trump’s new tariff policy.

“Trump’s tariff tax scam is simple: if at first your policies are ruled illegal, double down and try, try again,” said Ranking Member Markey. “America’s small businesses cannot bear another bruising round of uncertainty and consumers in Massachusetts and across the country cannot foot the bill for another punishing round of Trump’s tariff taxes. And they certainly cannot wait for another court decision. When will this administration listen and stop putting pain on Main Street? It’s time to end Trump’s latest round of tariff tax madness and deliver real relief to the American people.”

“The Trump administration has been stealing from small businesses and consumers to pay for their global trade war. Now – the Supreme Court has ruled Trump’s tariff tax illegal, but Trump is

doubling-down with new tariffs that will crush families and small businesses,” said Leader Schumer. “We need to protect Main Street from Trump’s erratic decision making and sky-rocketing prices. Small business should not bare the brunt of Trump’s whims. The Small Business Liberation 2.0 Act would shield consumers and businesses from further harm. I urge my colleagues to join in this legislation.”

To date, the Trump administration has collected nearly \$166 billion in illegal tariff revenue—a third of which likely came from small businesses. These illegal tariffs raised taxes on products from nearly every country on earth and jacked up prices for American small businesses, workers, and families. The average American household has paid more than \$1,700 in Trump tariff taxes. Trump’s new tariff taxes are projected to cost the average household another \$570 for the 150 days they are in place.

In addition to Ranking Member Markey and Leader Schumer, the Small Business Liberation 2.0 Act is cosponsored by Senators Mazie Hirono (D-Hawaii), Kirsten Gillibrand (D-N.Y.), John Hickenlooper (D-Colo.), Amy Klobuchar (D-Minn.), Chris Van Hollen (D-Md.), and Jackie Rosen (D-Nev.).

“Trump’s relentless attempts to implement illegal tariffs on other countries, while driving up prices for business owners and entrepreneurs, are once again threatening the very existence of small businesses across the country,” said Senator Hirono. “Small businesses are essential to our communities, and I am proud to join Ranking Member Markey once again in introducing legislation to shield these businesses from the fallout of Trump’s new global tariffs.”

“Small businesses are the backbone of the American economy, and they deserve better than President Trump’s illegal tariffs and cost-increasing

## Ranking Member Markey, Leader Schumer, Senate Democrats Lead Bill to Protect America's Small Businesses from Latest Tariff Tax Madness

Continued from page 1

chaos," said Senator Gillibrand. "I am proud to cosponsor the Small Business Liberation 2.0 Act and will continue to do everything in my power to shield New Yorkers from these horrific tax hikes."

"Trump's cost-raising tariffs have made it incredibly difficult for Nevada's small businesses to plan for the future. Even though the Supreme Court declared the tariffs illegal, Trump immediately doubled down and imposed additional

tariffs under a different, obsolete, and almost certainly unlawful authority – ensuring the chaos will continue," said Senator Rosen. "Our small businesses simply can't afford to stay open under these conditions, which is why I'm helping introduce this bill to exempt them from Trump's latest tariffs and provide them with much needed financial relief. Small businesses are the backbone of Nevada's economy, and I'm committed to doing everything I can to help them succeed."

Several small business stakeholders voiced their support for the Small Business Liberation 2.0 Act.

"Small businesses didn't ask to be collateral damage in global trade fights. When tariffs are imposed overnight, it's Main Street, not multinational corporations, that gets squeezed first," said Richard Trent, Executive Director of Main Street Alliance. "The Small Business Liberation 2.0 Act recognizes that reality by exempting small businesses from these duties, requir-

ing refunds for those already paid, and cracking down on price gouging that often follows tariff shocks. This legislation is a common-sense step to protect small businesses, stabilize prices for consumers, and ensure that trade policy doesn't come at the expense of the entrepreneurs who power our local economies."

### REQUEST FOR QUALIFICATIONS AND PROPOSALS (RFQ/P)

#### Commissioning Services

Garfield Elementary School –  
New Construction Project  
1640 22nd Avenue, Oakland, CA 94606  
Project No. 22102

March 4, 2026 (Issued)

Responses must be received March 19, 2026,  
no later than 2:00 p.m.

The Oakland Unified School District (“District”) is requesting proposals from experienced firms, partnerships, corporations, associations, persons or professional organizations (“Consultants”) to provide commissioning services for the new construction project at Garfield Elementary School (“Project”).

Interested firms are invited to submit a Statement of Qualifications (“SOQ”) and a detailed Fee Proposal (collectively “RFQ/P Packet”) as described below of the requested materials with a cover letter addressed to:

**Oakland Unified School District**  
Preston Thomas, Chief Systems and Services Officer  
Department of Facilities Planning and Management  
955 High Street, Oakland, CA 94601

Oral, telegraphic, facsimile, email, or telephone RFQ/P Packets will not be accepted. RFQ/P Packets received after this date and time will not be accepted. The District reserves the right to waive any informalities or irregularities in the RFQ/P Packets. The District also reserves the right to reject any and all RFQ/P Packets and to negotiate contract terms with one or more Respondents.

**The District will only accept electronic Proposals sent via email in lieu of hard copies. Proposals received by the District no later than 2:00 p.m. (Pacific Time) on March 19, 2026 via email will be accepted (attention to Juanita Hunter at [juanita.hunter@ousd.org](mailto:juanita.hunter@ousd.org) and the contact persons below).**

### LOCAL, SMALL LOCAL AND SMALL LOCAL RESIDENT BUSINESS ENTERPRISE PROGRAM

**District Modification:** Based on the current availability of small and local firms conducted by the

District’s LBU Consultant, the District is adopting the consultant’s recommendation to waive the entire 50% LBU Requirement for the scope of work referenced above.

**For Reference Only:** The Local Business Utilization Policy 7115 requires that there is a mandatory fifty percent (50%) LBU participation with a 25% or less Local Business (LBE) participation and a 25% or more Small Local or Small Local Resident Business (SLBE/SLRBE) participation for all capital program/construction-related contracts and professional services agreements.

On April 28, 2021, the Board of Education amended the Local Business Policy which had named the City of Oakland as the singular agency to certify local businesses to include five additional local business certifications. For businesses located in Oakland, Local Business and Small Local Business certifications may also be accepted from the Port of Oakland, Alameda County Transportation Commission, Alameda County Department of General Services, US Department of Transportation California Unified Certification Program, and the California Public Utilities Commission.

The District will follow the City of Oakland Small Business size standards in recognizing Small Local and Small Local Resident Businesses.

**Rent Board**  
**IMPORTANT NOTICE FOR LANDLORDS**  
San Francisco landlords need a license before imposing annual and banked rent increases on tenants according to the City's rent control laws. To obtain or renew a license, property owners are required to report certain information about their residential units into the San Francisco Housing Inventory each year. Property owners can submit their Housing Inventory information to the Rent Board in a few ways but are strongly encouraged to complete the process online at [portal.sfrb.org](http://portal.sfrb.org). Once the system accepts the submission, a rent increase license will be automatically generated and readily available. Owners can also deliver a paper Housing Inventory form to 25 Van Ness Ave., Suite 700, San Francisco, CA 94102 or to [rentboard.inventory@sfgov.org](mailto:rentboard.inventory@sfgov.org). Assistance is available by calling 311 or emailing [rentboard.inventory@sfgov.org](mailto:rentboard.inventory@sfgov.org). Visit [sf.gov/rentboard](https://sf.gov/rentboard) for more information.

## More Construction Companies Are Building a Technology-Focused C-Suite

Continued from page 1

perience. I started in business and finance roles, moved into large transformation initiatives, and eventually into executive leadership in data and analytics. Across consulting, manufacturing, retail and mobility, I was often working at the intersection of operations and technology. I've spent my career helping teams modernize without losing what made them strong. Over time, my work shifted from delivering technology to shaping direction. That shift was critical in preparing me for this role, not just understanding systems, but understanding how organizations change. A meaningful part of my journey has also been mentoring and coaching others. Leadership, to me, isn't just about building systems. It's about building people's confidence and capability. That perspective shapes how I approach

this role as well.

**Was there a moment when you knew you felt ready for this role?**

I realized I was spending more time helping leaders think through tradeoffs and long-term capability than focusing on individual initiatives. When your role becomes connecting vision to execution, building momentum and helping others see what's possible, you know you're operating at a different level. That said, readiness isn't about having everything figured out. It's about being confident in your ability to listen deeply, ask good questions and build something that adds value alongside the organization.

**How do you hope this position will influence other construction companies to put together a tech-forward strategy and begin investing**

**(or further their investments) in technology's role in the industry?**

I hope it helps reframe the conversation. Technology in construction shouldn't feel intimidating or feel like it's separate. It should feel supportive. When digital strategy is grounded in better insights, faster decisions, clearer forecasting and the preservation of institutional knowledge, it becomes a business advantage. I'm looking to demonstrate that digital adds measurable value to delivery and quality. When that becomes visible, I believe more firms will approach digital investment with confidence instead of hesitation. Construction firms that treat digital as optional will eventually find themselves behind.

**What do you hope to learn from this position?**

I want to understand the rhythm of the business

at a deeper level. I want to understand how work actually flows through the firm, where decisions slow down, where knowledge gets trapped, and where improvements, big or small, could have a meaningful impact. Architecture and engineering are thoughtful work. It's disciplined and deliberate for a reason. I want to introduce digital capability in a way that supports that rhythm rather than disrupts it. If I do this well, balancing innovation and adoption at the right pace, it won't feel like a technology overlay. It will feel invisible, quietly removing friction and allowing our amazing staff of engineers, architects and designers to focus on what they do best—solving real problems that shape communities.
