

Government Shutdown Puts Added Burdens on Federal Contractors

[Article originally appeared in
www.constructionexec.com]

By Jake Scott

The ongoing shutdown of the federal government, the result of a lapse of appropriations to keep the lights on in the federal government, has not relieved government contractors of their obligations to continue performance of their contracts. Despite the uncertainty of payment during the shutdown, contractors generally must continue work. Most contracting agencies are lightly staffed, making timely direction less likely. Nevertheless, contractors are obligated to continue performance. Start tracking shutdown impacts now to maximize the chances of recovery later.

Most Contracts Continue

Contracts funded before Oct. 1, 2025, are not likely to experience delays or slowdowns as a direct result of a lack of funds to pay for the work; agencies should already have the appropriated funds to pay for the work. The upshot is that a contractor should expect to continue performance during the shutdown unless directed otherwise by the contracting officer. That does not mean, however, that contractors will be paid on time. If history is any indicator, furloughs of agency staff will slow processing of contract payments. It is critically important that contractors not assume they are entitled to stop work if contract payments slow or stop. Only in rare cases does a lack of payment entitle a contractor to walk off the job. At this stage in the shutdown, it is unlikely that any such case has arisen.

Contracts that were not funded before Oct. 1,

Image credit by <https://bipartisanpolicy.org>

2025, will be dormant for the simple reason that the government does not have money appropriated to pay its obligations. More importantly for most contractors, during the shutdown, the government will not be able to exercise options, issue contract modifications, or award task orders. This will become a more pressing problem the longer the shutdown stretches.

Communicate With the Contracting Officer

As with most undertakings, communication is the key to success. Contractors should keep in contact with their contracting officers. By now, many contracting officers have been furloughed, but they should have provided contractors with direction on how to proceed. Unless a contract-

ing officer issues a stop-work order or suspends the contract, a contractor should assume its performance obligations are alive and well. Most federal agencies have published shutdown plans, which can be a useful source of information in addition to the contracting staff.

Even when required to continue performance, contractors may face other hurdles. Access to federal facilities may be disrupted or impossible. Required direction, review, and approval may be difficult or impossible to obtain. Contractors should anticipate performance delays outside of their control.

Mitigate Damages

Among the most difficult decisions a contractor

faces during a shutdown is how to treat employees unable to work on a government contract to which they were assigned. Contractors should take reasonable steps to reassign those employees to other projects if possible. Paid leave, furloughs, or layoffs may also become necessary. These steps are important because the government generally will not pay for employees kept waiting in the wings during a shutdown. Contractors should consider their obligations under federal and state employment laws, as well as any contracts with the employees themselves and collective bargaining agreements.

Although a less fraught consideration, demobilization or reassignment of equipment may also become necessary in cases where access to work sites has not been restricted. This may be complicated where equipment is rented or leased, or if it is specialized equipment that is difficult to find, because once the shutdown ends, the government will expect performance to resume at full strength—reassigned equipment that cannot be immediately remobilized may cause additional delays. There are no perfect answers to these situations, and contractors should apply their best judgment to the known facts when deciding how to proceed.

Plan Now for Requests for Equitable Adjustment

Contractors should start planning now to submit requests for equitable adjustment when the government reopens. Because the shutdown is an unforeseeable act of the government and not the contractor's fault, contractors will be entitled to schedule adjustments but generally not compensable delays.

Swinerton Selects Autodesk Build to Help Power Future Growth

[Article originally appeared in
www.autodesk.com]

By Autodesk

In today's construction landscape, the ability to adapt and innovate is more than a competitive advantage, it's a necessity. As projects grow in complexity and client expectations continue to rise, leading contractors are rethinking how technology can elevate every phase of delivery. In a bold move to modernize project delivery and support its continued growth, Swinerton—a 100% employee-owned company and ENR Top Contractor—will be standardizing all building projects on Autodesk Build, a core solution within Autodesk Construction Cloud (ACC).

This strategic decision marks a major milestone in Swinerton's digital transformation journey and underscores its commitment to delivering exceptional client value through innovation, transparency, and collaboration.

A Strategic Shift Rooted in Collaboration

The decision to adopt Autodesk Build across all building projects follows a comprehensive evaluation led by Swinerton's technology team. This initiative incorporated feedback from employees across departments, divisions, and roles

to ensure the selected platform would meet the diverse needs of the organization.

“By standardizing on Autodesk Build, we're not just adopting a new tool, we're embracing a smarter way to work,” said Kim DeYoung, Vice President of Digital Technology at Swinerton. “This platform assists our teams in providing industry-leading commercial construction, construction management, design-build and self-perform services, communicating more transparently with our clients, and fostering deeper trust across every project.”

Unlocking Efficiency, Transparency, and Innovation

Autodesk Build will serve as Swinerton's central hub for all non-cost project management functions, including RFIs, submittals, meeting minutes, drawings, checklists, issues, and daily journals.

With the adoption of Autodesk Build, Swinerton is poised to transform how its teams manage projects from start to finish. The solution reduces redundant workflows while enhancing collaboration with clients, subcontractors, and business partners. Additionally, it empowers internal teams to work more efficiently across Swinerton's project portfolio by providing access to a unified, connected environment from anywhere.

ton's project portfolio by providing access to a unified, connected environment from anywhere.

Building a Data-Driven Future

Swinerton's investment in Autodesk Build is also a key step toward a more data-intelligent future. By laying a strong groundwork for advanced analytics, automation, and AI, Swinerton is modernizing its tech stack to deliver not only operational excellence but also extraordinary client experiences. The result is a more transparent and agile approach to construction and reflects Swinerton's commitment to innovation and its employee-owned values.

“We're rebuilding our data foundation and creating new pipelines for all of our enterprise products,” DeYoung added. “With Swinerton's growing data team, we're exploring use cases that help us better serve our clients—whether that's identifying jobs suited for our mass timber subsidiary, Timberlab, or informing investment decisions for our development arm.”

This forward-thinking approach positions Swinerton to not only meet today's project demands but to lead the industry in predictive analytics, automation, and more sustainable construction practices.

Swinerton and Autodesk's Shared Vision for Connected Construction

Autodesk's collaboration with Swinerton represents more than a technology rollout—it's a shared commitment to reshaping how construction projects are delivered. As an employee-owned company, Swinerton brings a unique culture of accountability and innovation to every job site, and Autodesk is proud to be part of that journey.

“Swinerton's decision to standardize on Autodesk Build is a powerful signal to the industry,” said Ilai Rotbaein, Vice President, Product Management at Autodesk.

“From strengthening collaboration to unlocking the potential of data and AI, this partnership is about empowering teams to deliver with greater precision, transparency, and impact. We're excited to support Swinerton as they continue to set new industry benchmarks for client value and project delivery.”

CALIFORNIA SUB-BID REQUEST ADS

REQUEST FOR SUBCONTRACTORS/SUPPLIERS/SERVICE PROVIDERS

Caltrans Contract 03-3H51U4

FOR CONSTRUCTION ON STATE HIGHWAY IN NEVADA COUNTY NEAR GRASS VALLEY FROM 0.2 MILE SOUTH OF LA BARR MEADOWS ROAD TO 0.1 MILE NORTH OF SOUTH GRASS VALLEY OVERCROSSING (General work description: Rdwy excavation, place HMA, trenchless culverts, and retaining walls.)

Bid Date: November 6, 2025 at 2:00 PM

Engineers Estimate: \$83M

****This is an Electronic bid submittal****

****Quotes not received by 11:00 AM on bid day may not be reviewed/evaluated****

Flatiron Dragados Constructors, Inc. (FDCI) requests subcontractor/supplier/service participation for the following Items of work, but not limited to: Construction Area Signs & Roadway Signs, Clear & Grub, Erosion Control, AC Paving, Cold Plane AC, Rebar, Tie Back Anchors, Overhead Signs 60" CIDH Sign Foundation, Painting/Concrete Staining, Asphalt Dike/Curbs, Underground Utilities, Fences & Gates, Metal Railing, MBGR, Bridge & Roadway Concrete Barrier, Striping & Markings, Electrical, Minor Concrete, Jack & Bore, Abandon Well, Traffic Control, Aggregates including: CL2 AB, Rip Rap(20lb to ½ ton), Ready Mix Concrete, Concrete Pumping Services, Steel Soldier Pile, Misc. Metals, Iron & Steel, Trucking Services, SWPP Plan & SWPP Materials, Lead Compliance Plan, Geotextile Materials, Form Liner, Underground Precast, QC Testing, Street Sweeping, Treated Wood Waste.

Refer to Caltrans new Spec Section 2-1.11 IN-USE OFF-ROAD DIESEL-FUELED VEHICLE LIST.

100% performance/payment bonds will be required for the full amount of the subcontract price. Please contact FDCI for any assistance to this solicitation, including obtaining bonding, insurance, equipment, materials and/or supplies. Provide subcontractor/supplier scopes/quotes as early as possible to enable estimators to perform a thorough evaluation of all quotes received. Quotes will be broken down into comparable packages as reasonably necessary to facilitate participation. Quotes must be valid for the same duration as specified by the Owner for Contract Award. We are signatory to Operating Engineers, Laborers, Cement Masons, Carpenters and Pile Drivers Unions. Non-signatory subs will be required to sign an agreement for trades covered under our union agreements. Flatiron intends to work cooperatively with subcontractors and suppliers for all bid items you are licensed and qualified to perform. Bid items can be split to facilitate participation from all firms. FDCI will reimburse for bond premium up to 2%. **Firms must possess & provide current contractor's license number & DIR Registration number on the quote.** Firms must possess insurance and workers compensation coverage meeting project requirements. Waiver of Subrogation is required. Please contact FDCI for any assistance required by your firm. Subcontractors/Suppliers will be required to execute our standard agreements and agree to the standard general terms & conditions. Copies are available for review on our Box.com ftp site upon email request.

To view and download projects docs for FREE from the Caltrans website you will need to "Create an Account" with Caltrans Bidding Connect. Government Shutdown Puts Added Burdens on Federal Contractors

Continued from page 1

Those schedule adjustments will stave off the threat of liquidated damages. Nevertheless, contractors should track any costs resulting from shutdown delays. Because the law abhors absolutes, there may be circumstances that entitle a contractor to compensable delay time.

Contractors will also likely experience direct costs as a result of the shutdown. Tracking those added

costs now, rather than trying to reconstruct them later, will improve a contractor's chances of recovery. Costs may result from actual changes (e.g., directives from the contracting officer) or constructive changes (e.g., the government's failure to provide direction because staff were furloughed). Using different cost codes to track these added costs will help segregate the costs and simplify documentation when the time comes to prove up the amount of an REA.

Document, Document, Document

Among the most valuable steps a contractor can take during the shutdown (and any other time) is simple: document, document, document. Document delays regularly. Document all costs incurred during the shutdown, whether they appear at the moment to be recoverable, or even necessarily attributable to the shutdown. Document communications with the government. Of particular importance, do not conduct business

with the government by text and telephone. If that becomes unavoidable, follow up with an email reiterating the content of the text or phone call. The minor effort will pay for itself later in the form of a detailed record in support of an REA.

555 Exchange Court, Livermore, CA 94550
(925) 373-8370, Fax (925) 373-0940

Project: City of Parlier Wastewater Treatment Plant Improvements (REBID)
Owner: City of Parlier
Bid Date: December 3rd, 2025 @ 2:00 P.M.

We are requesting quotes from all qualified DBE Subcontractors and Suppliers but not limited to:

PIPE SUPPLIERS, PIPE SUPPORTS, PRECAST MATERIALS, MISC. METALS, CONCRETE STRUCTURES, ELECTRICAL, HANDRAILING, STEEL PIPE, MASONRY, ROLL-UP DOORS/ACCESS DOORS/DOORS & HARDWARE, PUMPING PLANT ELECTRICAL EQUIPMENT, GENERATORS/SWITCHGEAR, HVAC/MECAHNICAL, DRAINAGE PUMPING EQUIPMENT, PAINTING/COATINGS, ROOFING, GRATE, WOOD TRUSS, VALVES/WATER MAIN/ TEMP FACILITIES, LINER.

Project Description:

The major work consists of the replacement of an existing aerated lagoon wastewater treatment plant with a new extended aeration treatment facility. The new treatment facility will provide aeration via turbo blowers and floating aerator chains with motorized butterfly valves. Secondary treatment will be provided by two circular clarifiers with spiral blade scrapers, density current baffles, and fiber glass weirs. Sludge will be pumped by three self-priming chopper pumps and either recirculated to the plants new influent structure or directed to the high-rate textile media sludge drying beds for dewatering. Polymer will be injected prior to the discharge of the sludge into the sludge drying beds. Scum collected by the secondary clarifiers will also be pumped via submersible pumps to the sludge drying beds. The water collected by the sludge drying beds will be directed to a drain pump station where two submersible pumps will recirculate the drain water back into the plant. Plant effluent will be collected within existing storage ponds and distributed to four new reclamation fields via two mixed flow impeller vertical turbine pumps.

All new equipment will be housed in CMU buildings.
