# **Avoid Thirteen Costly Bidding Mistakes**

#### **By Kendall Jones**

Putting together a winning bid proposal is a lot more complicated than putting some numbers together and hoping for the best. Good bid preparation requires a lot of time and effort that involves everything from reading and fully understanding the plans and specifications to accurately estimating costs for labor, materials, and equipment. Making even the smallest mistake can mean the difference between having a winning bid proposal and missing out on a coveted project.

#### **Bidding the Wrong Projects**

You don't have to bid on every job you come across. Winning jobs your company can't adequately perform can be just as costly as not winning them. Remember, it is never too late to abandon a bid you are working on. For example, let's say you have purchased plans, attended the prebid meeting, and started taking subcontractor pricing and you start crunching the numbers only to realize that your company won't make an

acceptable profit. The best thing to do is dump it and move on to the next project.

If at any time during the preparation of a bid you determine that your company cannot adequately handle the scope and requirements of the project you need to make the smart business decision to abandon your bid. Finding the right balance between bidding and winning enough jobs can be difficult.

On the one hand, you don't want to bid and win so many jobs that you get to the point that you can't properly manage and deliver the projects but you also don't want too little work that you aren't making any money and your workers aren't staying busy. Selecting the right work to bid is vital to maintaining a profitable business.

#### **Incomplete Bid Forms and Documents**

Failing to fully complete the bid form and submit all required documents is a surefire way to get what might otherwise be a winning bid rejected. Required documents and paperwork can be anything from bid bonds to acknowledging receipt of any addenda. A good way to ensure that

you have all the required paperwork for your bid is to use a checklist as you prepare your bid and then go back and double-check to make sure that everything is included. It never hurts to get another set of eyes to look over the bid proposal to make

#### **Description of project:**

The work to be performed under this contract includes the construction of a new underground substation located at the intersection of Thompson Street and 6th Avenue, in the Borough of Manhattan. The scope of the work is summarized as follows:

1. Construction of a below grade steel reinforced substation together with all ancillary facilities including ventilation flues, ingress / egress stairways and connections to the tracks. The substation shall be equipped with power transformers / rectifiers, ventilation equipment, supervisory, control and communications systems, and all associated cables.

2. Installation of a new PLC cabinet at the Greenwich Substation for a SCADA upgrade at the Greenwich Substation and for integration of the Canal Street and 28th Street Substations into NYC Transit Zone 6, and the Command Center at 53rd Street. Connections between the substations shall be via fiber optic and control cables through existing manholes.

3. All requisite surface restoration work, including restoration of the Grand Canal Court.

Many bidding opportunities are available: progress photos, pest control, cpm scheduling, rebar supply and installation, crack and spall repair, survey, instrumentation and monitoring, masonry, structural steel, miscellaneous metals, waterproofing, doors, painting, tile, toilet accessories, plumbing, HVAC, hatches, cleaning, H+D soils, arborist, electrical, communications, mpt supplies, fencing, testing and inspections, dumpsters, asphalt concrete paving, curbs and sidewalks.
