

New-York Historical Society, 1804 and Today

By New-York Historical Society

Editor's note: We are publishing this address that the New-York Historical Society produced in 1829 to recognize the organization's founding in 1804. (This address is archived in the Library of Congress.) The city's first museum is now adding a four-story structure and renovating its current landmark building. Turner Construction has been selected to provide construction services. Please see the advertisement below for details on the New-York Historical Society Project, a virtual information session, and upcoming bid packages.

The utility of societies for the advancement of science, has been so fully proved by the experience of the most enlightened nations of Europe, and by that of our own country, that there can be no need, at this time, of any formal arguments in support of their claim to public patronage.

It is well known that many valuable manuscripts and papers relating to the history of our country and in whose custody they might be preserved for the general benefit of society. To rescue from the dust and obscurity of private repositories such important documents, as are liable to be lost or destroyed by the indifference or neglect of those into whose hands they may have fallen, is a primary object of our attention.

The paucity of materials relating to the first settlement and to the colonial transactions of this State, and the extreme difficulty of procuring them can be fully appreciated by those only who have projected an historical monument of those events, and for this purpose have examined into

TO THE PUBLIC.

The Address of the New-York Historical Society.

HAVING formed an association, for the purpose of discovering, procuring, and preserving whatever may relate to the natural, civil, literary, medical and ecclesiastical history of our country, and particularly of the State of New-York, we solicit the aid of the liberal, patriotic and learned, to promote the objects of our institution.

The utility of societies for the advancement of science, has been so fully proved by the experience of the most enlightened nations of Europe, and by that of our own country, that there can be no need, at this time, of any formal arguments in support of their claim to public patronage.

It is well known that many valuable manuscripts and the nature and amount of their resources. Without the aid of original and authentic documents, history can be nothing more than a well combined series of ingenious conjectures and amusing fables; and, therefore, as the cause of truth is interesting
