California's New Space Industry Task Force to be led by the Governor's Office of Business and Economic Development

[Article originally appeared in https://business.ca.gov]

The Governor's Office of Business and Economic Development (GO-Biz) announced a new Space Industry Task Force, to be led by GO-Biz Director and Senior Advisor to Governor Gavin Newsom, Dee Dee Myers.

The announcement first came from Governor Gavin Newsom at the All California Defense Leadership Summit, hosted by the Association of Defense Communities with the California Defense Communities Alliance and California Governor's Military Council in Sacramento. There, more than 200 military, defense and community leaders and stakeholders throughout California gathered to share challenges and solutions to national security issues throughout the state. Key leaders at the event targeted opportunities to grow the space industrial sector in the state and discussed initiatives to enhance existing defense capabilities.

As a global leader in aerospace and advanced manufacturing, California will pursue opportunities to improve its position and harness future growth in the space industry, both commercial and military, with the formation of this new Task Force. Partnering with GO-Biz in this work will be leaders from the Governor's Military Council, the Office of Planning and Research (OPR) and

the Labor and Workforce Development Agency.

"California is truly a star when it comes to aerospace. We have a long list of unique assets that make us the perfect home for this critical and exciting industry, and we are committed to taking the nation's space program to the next frontier," said Governor Gavin Newsom.

California is already home to nearly one-third of all American space tech companies, and more than one in ten of those globally. In the last 11 years, California has attracted nearly half of the nation's space tech investment capital. This year alone, California has brought in more than 85% of the total capital invested in United States, space-related companies.

"America's best-trained and most-experienced aerospace and technology workforce lives and works here. In total, we are home to the nation's largest concentration of military personnel. I know this task force will create amazing opportunities for all Californians," said GO-Biz Director and Senior Advisor to Governor Gavin Newsom, Dee Dee Myers. "This industry provides more than 500,000 high-paying jobs and generates more than \$66 billion in annual economic activity. That's more than the agricultural and entertainment industries combined – and it generates more than \$7 billion in

Construction Input Costs Decrease 1.1 Percent Amid Falling Fuel Prices, But Other Goods And Some Services Continue Upward Price Trend

[Article originally appeared in www.agc.org]

The price of materials and services used in non-residential construction declined by 1.1 percent from July to August as a steep drop in fuel prices masked increases in the cost of other construction inputs, according to an analysis by the Associated General Contractors of America of government data released today. Association officials cautioned that limited price declines cannot undo the harm of clogged supply lines and labor shortages.

"Today's price report highlights the mixed conditions contractors are experiencing, with many costs still rising sharply while others take a breather," said Ken Simonson, the association's chief economist. "Meanwhile, an industry survey we recently released found that supply-chain issues and labor availability are delaying many construction projects."

The survey, which the association conducted with Autodesk and released on August 31, asked construction firms about the impact of shortages and delivery delays on project completion times, among other topics. Eighty-two percent of firms reported projects had been delayed due to longer lead times or shortages of materials, while 66 percent reported delays due to shortages of employees or subcontractors.

The producer price index for inputs to non-residential construction—the prices charged by goods producers and service providers such as distributors and transportation firms—decreased 1.1 percent from July to August but nevertheless rose 13.0 percent since August 2021. The index for energy used in nonresidential construction plunged 13.1 percent for the month. In contrast, the index for goods other than energy and food rose 0.3 percent after declining for two months. The index for services was similarly mixed, with an overall dip of 0.4 percent but with a 1.2 per-

cent increase in the index for services other than trade, transportation, and warehousing.

Prices of several widely used goods rose in August, partially offsetting declines for fuel, lumber, and some metal products prices. The price index for gypsum building materials such as wallboard jumped 3.3 percent for the month. Indexes rose for construction machinery and equipment (2.6 percent), flat glass (2.4 percent), copper and brass mill shapes (2.0 percent), ready-mixed concrete (1.6 percent), and asphalt paving mixtures and blocks (1.0 percent). Among services, the price index for equipment rental and leasing climbed 3.7 percent.

These increases were more than offset by one-month decreases in August in the index for diesel fuel, -13.4 percent; steel mill products, -5.7 percent; aluminum mill shapes, -3.9 percent; and lumber and plywood, -2.9 percent. The fuel price drop contributed to a 1.9 percent fall in the index for truck transportation of freight.

Association officials said supply-chain disruptions like a potential rail strike, along with a shortage of qualified construction workers, threaten to delay and increase the cost of muchneeded infrastructure and manufacturing construction. They urged public officials to help keep freight moving and invest in workforce development.

"Declines in materials costs mean little if neither goods nor workers are available," said Stephen E. Sandherr, the association's chief executive officer. "Federal officials need to do all they can to remove supply bottlenecks and invest in construction education and training programs."

When all pandemic restrictions are lifted, we will offer these services again in our office by appointment only. Thank you for your understanding

-DBE Subs/Suppliers: Indicate lower tier DBE participation offered on your quotation, as it will be evaluated with your pri

100% performance/payment bonds will be required for the full amount of the subcontract price. Please contact Flatiron for any assistance to this solicitation, including obtaining bonding, insurance, equipment, materials and/or supplies. Provide sub-contractor/supplier scopes/quotes as early as possible to enable estimators to perform a thorough evaluation of all quotes received. Quotes will be broken down into comparable packages as reasonably necessary to facilitate participation. Quotes must be valid for the same duration as specified by the Owner for Contract Award. We are signatory to Operating Engineers, Laborers, Cement Masons, Carpenters and Pile Drivers Unions. Non-signatory subs will be required to sign an agreement for trades covered under our union agreements. Flatiron intends to work cooperatively with subcontractors and suppliers for all bid items you are licensed and qualified to perform. Bid items can be split to facilitate participation from all certified firms. Flatiron West will reimburse for bond premium up to 2%. Firms must possess & provide current contractor's license number & DIR Registration number on the quote. Firms must possess insurance and workers compensation coverage meeting project requirements. Waiver of Subrogation is required. Please contact Flatiron for any assistance required by your firm. Subcontractors/Suppliers will be required to execute our standard agreements and agree to the standard general terms & conditions. Copies are available for review on our Box.com ftp site upon email request.

California's New Space Industry Task Force to be led by the Governor's Office of Business and Economic Development

Continued from page 1

state and local taxes."

Director Myers, as the daughter of a Naval aviator, has experienced firsthand the sector's deep roots in California and what it means for the state's families and economy.

In partnering with the space industry, the Task Force will work to bring incredible opportunities to California, including:

- Attracting and catalyzing new businesses, including international businesses
- Expanding existing aerospace and space businesses
- Growing California's workforce and providing more well-paying jobs

Expanding research and development in aerospace and advanced manufacturing

- Building more testing and launch capability
- Working with California's higher education system to create potential new career paths and fill the expanded need for skills such as quantum physics and AI; and
- Creating new models for public/private cooperation, such as allowing private investments in Department of Defense infrastructure

Additionally, California is proud to offer significant financial incentives to industry leaders. GO-Biz's signature investment program, Cal-Competes, has awarded close to \$200 million in tax credits and grants to aerospace companies since 2019

With the state's support, Relativity Space leased a former Boeing manufacturing facility in Long Beach and committed to creating over a thousand new jobs there and at their second launch site at Vandenberg. Their massive 1 million square foot Long Beach facility has the largest 3D printers in the world, which will produce the full-scale space technologies necessary to make a Mars mission possible. CalCompetes also provided Astra with the capital needed to expand both manufacturing and research-and-development capabilities at their facility in Alameda.
